## Dedications

This novel is dedicated to God for giving me, my talent, my family, my friends (I know who you are), fans of the S.D.C. series, and Larving "Magic" Johnson, one of my main idols, you're great, and I mean that.

## De - Dedications

Fu-- Kelly Hackett,

Fu-- Lauren Langbaum,

Fu-- Mrs. Dowling,

Fu-- The Triple T (you bunch of fu--in'  
white pu--ies),

Fu-- those that try to keep me  
down,

Fu-- those test book writers that  
leave ski-out,

Fu-- sell outs

Fu-- mutha fu--ers that think  
they're so got-da-n cool  
and tough,

Fu-- blacks bullin' other blacks  
and fu--in' up the race  
and given the prejudiced

white man what he wants,

fu-- Jews that bite - all the  
time and use double standards,

fu-- school (well most classes),  
what the fu-- are we gonna  
use most of this shi-- for?,

fu-- overly prejudiced as - hoks,

fu-- all the rest I didn't list

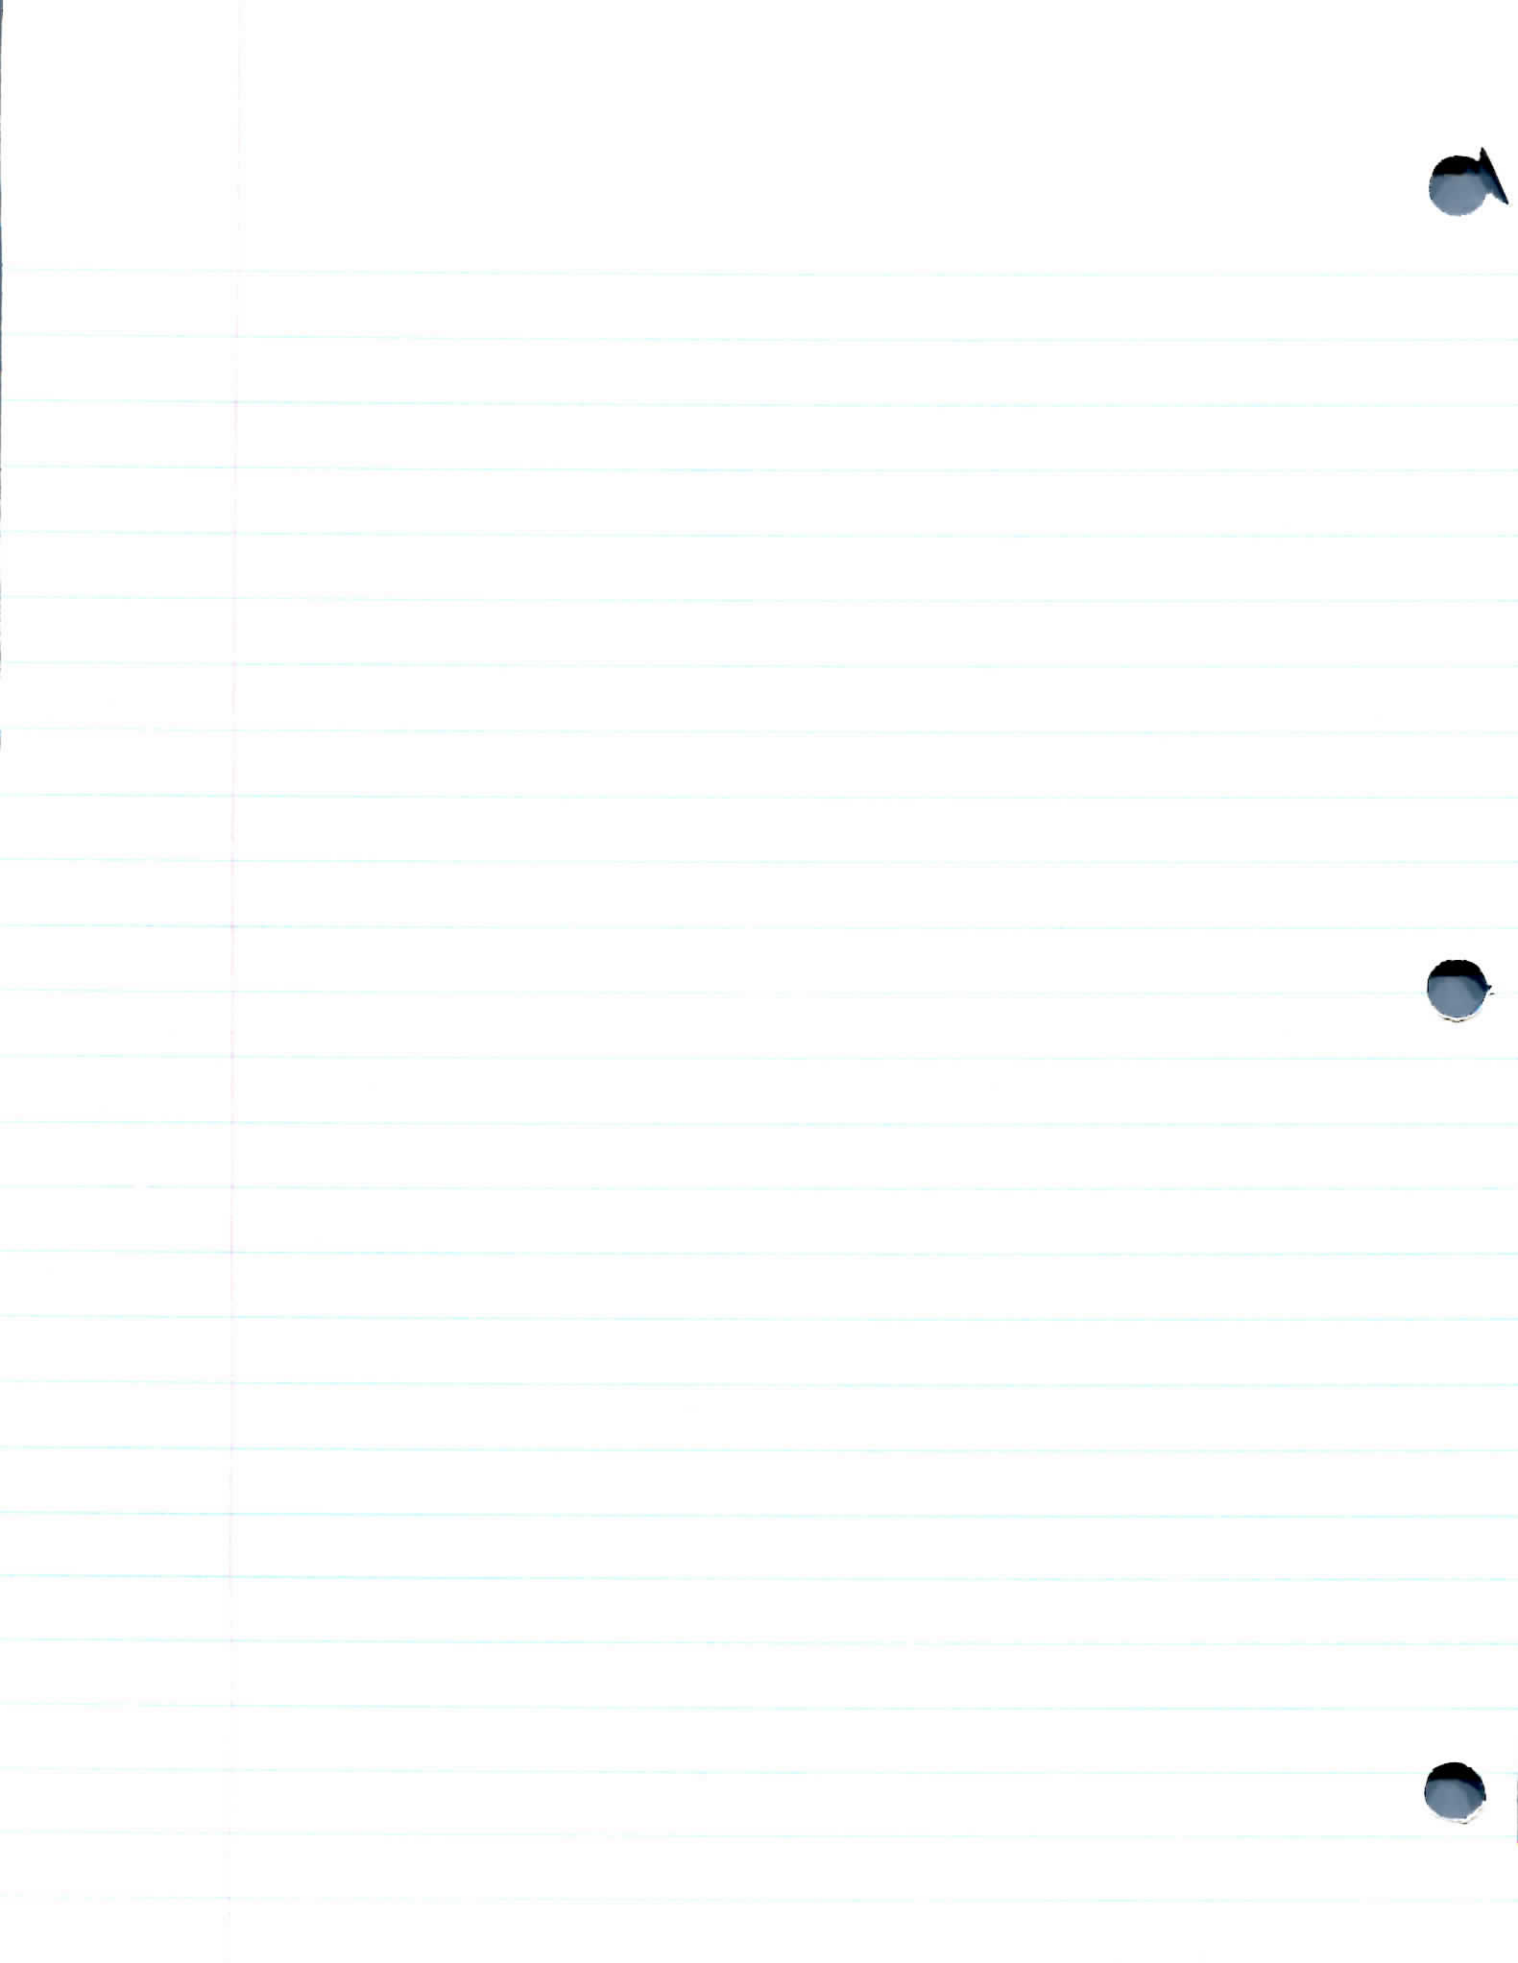

and fu-- the got da-n, bullshi-in',  
piece of shi-, you can lick my  
as-, mutha fu-- in', corrupt -  
as - government.

So all you mutha fu--ers  
I listed and more, you can suck  
my big di-- twice over to the  
mutha fu-- in' right, then left,  
up and down, suck your da-n  
teeth, and as I said before, you  
can suck my di-- till your lips

fall off (especially you two, Kelly  
Macket and Lauren Landraun;  
cheap as-, tramp as-, no-  
as- bitc-es.

In the words of the "Ligga  
Happy" Sex Boys, "Fu--'em all".

Many people will ask what a Dodo or Crystal Person is. They aren't much different from humans. You see, crystals have a perfect shape and are perfectly made up of crystalline molecules. A Dodo is a cross between a human and a crystal. Dodos' cells are crystalline. This enables them to use

their super powers. All living things have some sort of invisible field around them. When Dorodans focus their minds, they focus the beam. That basically explains their powers.

Enjoy the story...

## Cast of Characters

1979-1983

Acro

Blavy Beave

Billy Bear

Cairce

The Claw

Cathleen Cooke

Deem

President Deen

Ms. Dike

Yart I

Yart II

Grease Monkey

Angelica Leone

Commander Leone

D.J. Leone (As-Inspector)

Jeremy - (As-Inspector)

K.A.G. - Kick As-Inspector

K.I.G. - Killer Intuition Inspector

David Majewski

Sadonja Majewski

Lauricia

Mike Mason

Matt

Mimla

Captain Jason Neff

Ricardo's

Jordan Ripstein

Captain Sellers

Cestron Sims

Edmund Sims

Scott Gipsword

and a surprise appearance by  
Haven.

The book also has special appearances  
by Sheriff Pook Bear, Pussy Bear, P.J.  
Bear, and Dave Hanley, and the He--'s  
Angels and Sam Osprey and the Corporation.

## Chapter 87: Natural Feelings

On the S.S.C....

Cestron really wanted to set Ms. Dike straight. "Look bitch-, I'm tired of all your snooty as-bullshi-!" he rehearsed. He walked up to Ms. Dike's room, "Might as well try the direct approach." He rang the door bell.

"Yes?" Ms. Dike answered.

"It's me," Cestron replied.

"Oh it's only you," Ms. Dike said sarcastically.

"What's botherin' you?" Cestron asked.

"None of your da-m business," Ms. Dike said with anger in her voice. 507

"Alright," she agreed to explain, "I've lost my husband and my daughter. I can't take this anymore. Your son, I can't believe she married him. Ever since they got together, there's been nothing but conflict."

"First of all," Astron went off.

In Edmund's quarters...

"What do you think of me Angelica?" Edmund asked.

"What do you mean?" she asked.

"You loved every minute of bickin' my ass - on the Crystal Planet, didn't you?"

"I have to admit, it was a challenge," Angelica replied.

"You're really cool, don't you know?" Edmund asked.

Angelica had a sensual look in her eye, "It's time for your next treatment."

"Why do I need all these treatments?"

"Edmund, you know. If we don't get married and you don't get treatments, 508

you'll get sick."

"But I get to sexual, the next mornin' I don't know what I did."

Angelica put her hand on Edmund's penis. She laid him down with her other. She kissed him for about a minute.

Edmund pushed her off, "Hold it, I've got to show you something. Well actually, two things. Marilva told me that a token of love would be sufficient. You're just tryin' to take advantage of me aren't you? You married I changed my earring. It's a crystal earring. Here's your pair."

"Thanks, but I'm gonna fu-- the shi-- outta you."

"Hold it," Edmund pushed her off again. Edmund sprayed Angelica in the face with the pink dust. He then sprayed himself with it. They fu--ed one of the best fu--s. Their doorbell rang.

"Aye come in," Edmund said kissing <sup>509</sup>

all over Angelica's big breast. He then removed the black bra. Angelica rubbed herself all up against Edmund. She was matured in the breast. Edmund kissed all over them. Angelica unbuttoned his pants and kissed all over his penis. She then licked it all over. Edmund kissed all over her pu- - y. Once they finished all of the freaky stuff, they came and kissed for a while.

Edmund was truly and utterly seduced by Angelica as D.J. was toward Commander. Dorodan women have immense sexual and bioral, possibly control over men. Not so much for Dorodan men though.

Cestron and Ms. Dike walked in.

Ms. Dike was astonished, "Oh my-lord!"

"Aye Mom, warsup?" Angelica said under the influence of the STD

pink dust.

"That is not my daughter," Mrs. Dike pointed at Angelica.

"Ah shut the fu--up, Dike--," Edmund said under the influence.

"I'm disowning you, Edmund," Mrs. Dike announced as she walked out rapidly.

"You can't disown him," Astron explained, "he's my son."

"Then I'm disowning you Astron."

"They want," Astron went after Mrs. Dike.

"Oh well, fu--it," they said together.

An hour later...

"I love you Angelica, & really do," Edmund announced.

"I love you too Edmund," she had the sexual look in her eye again.

"They want what are you doing?" Edmund asked. Angelica got on top of her boyfriend, "Want what huh, uh."

Angelica looked into Edmund's eyes, 511

He was put into a daze, "This won't hurt a bit, darling." She put two fingers to her lips and then placed them on Edmund's lips. He fell unconscious. Angelica turned into her fatal, pink, gaseous form. She went in through Edmund's ears, nose, and mouth. Edmund immediately crystallized.

A minute later...

"How do you feel?" Angelica asked Edmund.

"I feel, I feel different. What happened?" Edmund asked Angelica.

"You're mine forever Edmund," Angelica explained. "I crystallized you. You see, humans or Drowdons are not supposed to marry out of your species. You crossed the line with Maikava, you had kids. They'll probably have kids and so on. What makes the difference in species?"

"I don't know, what?" Edmund said.

asked.

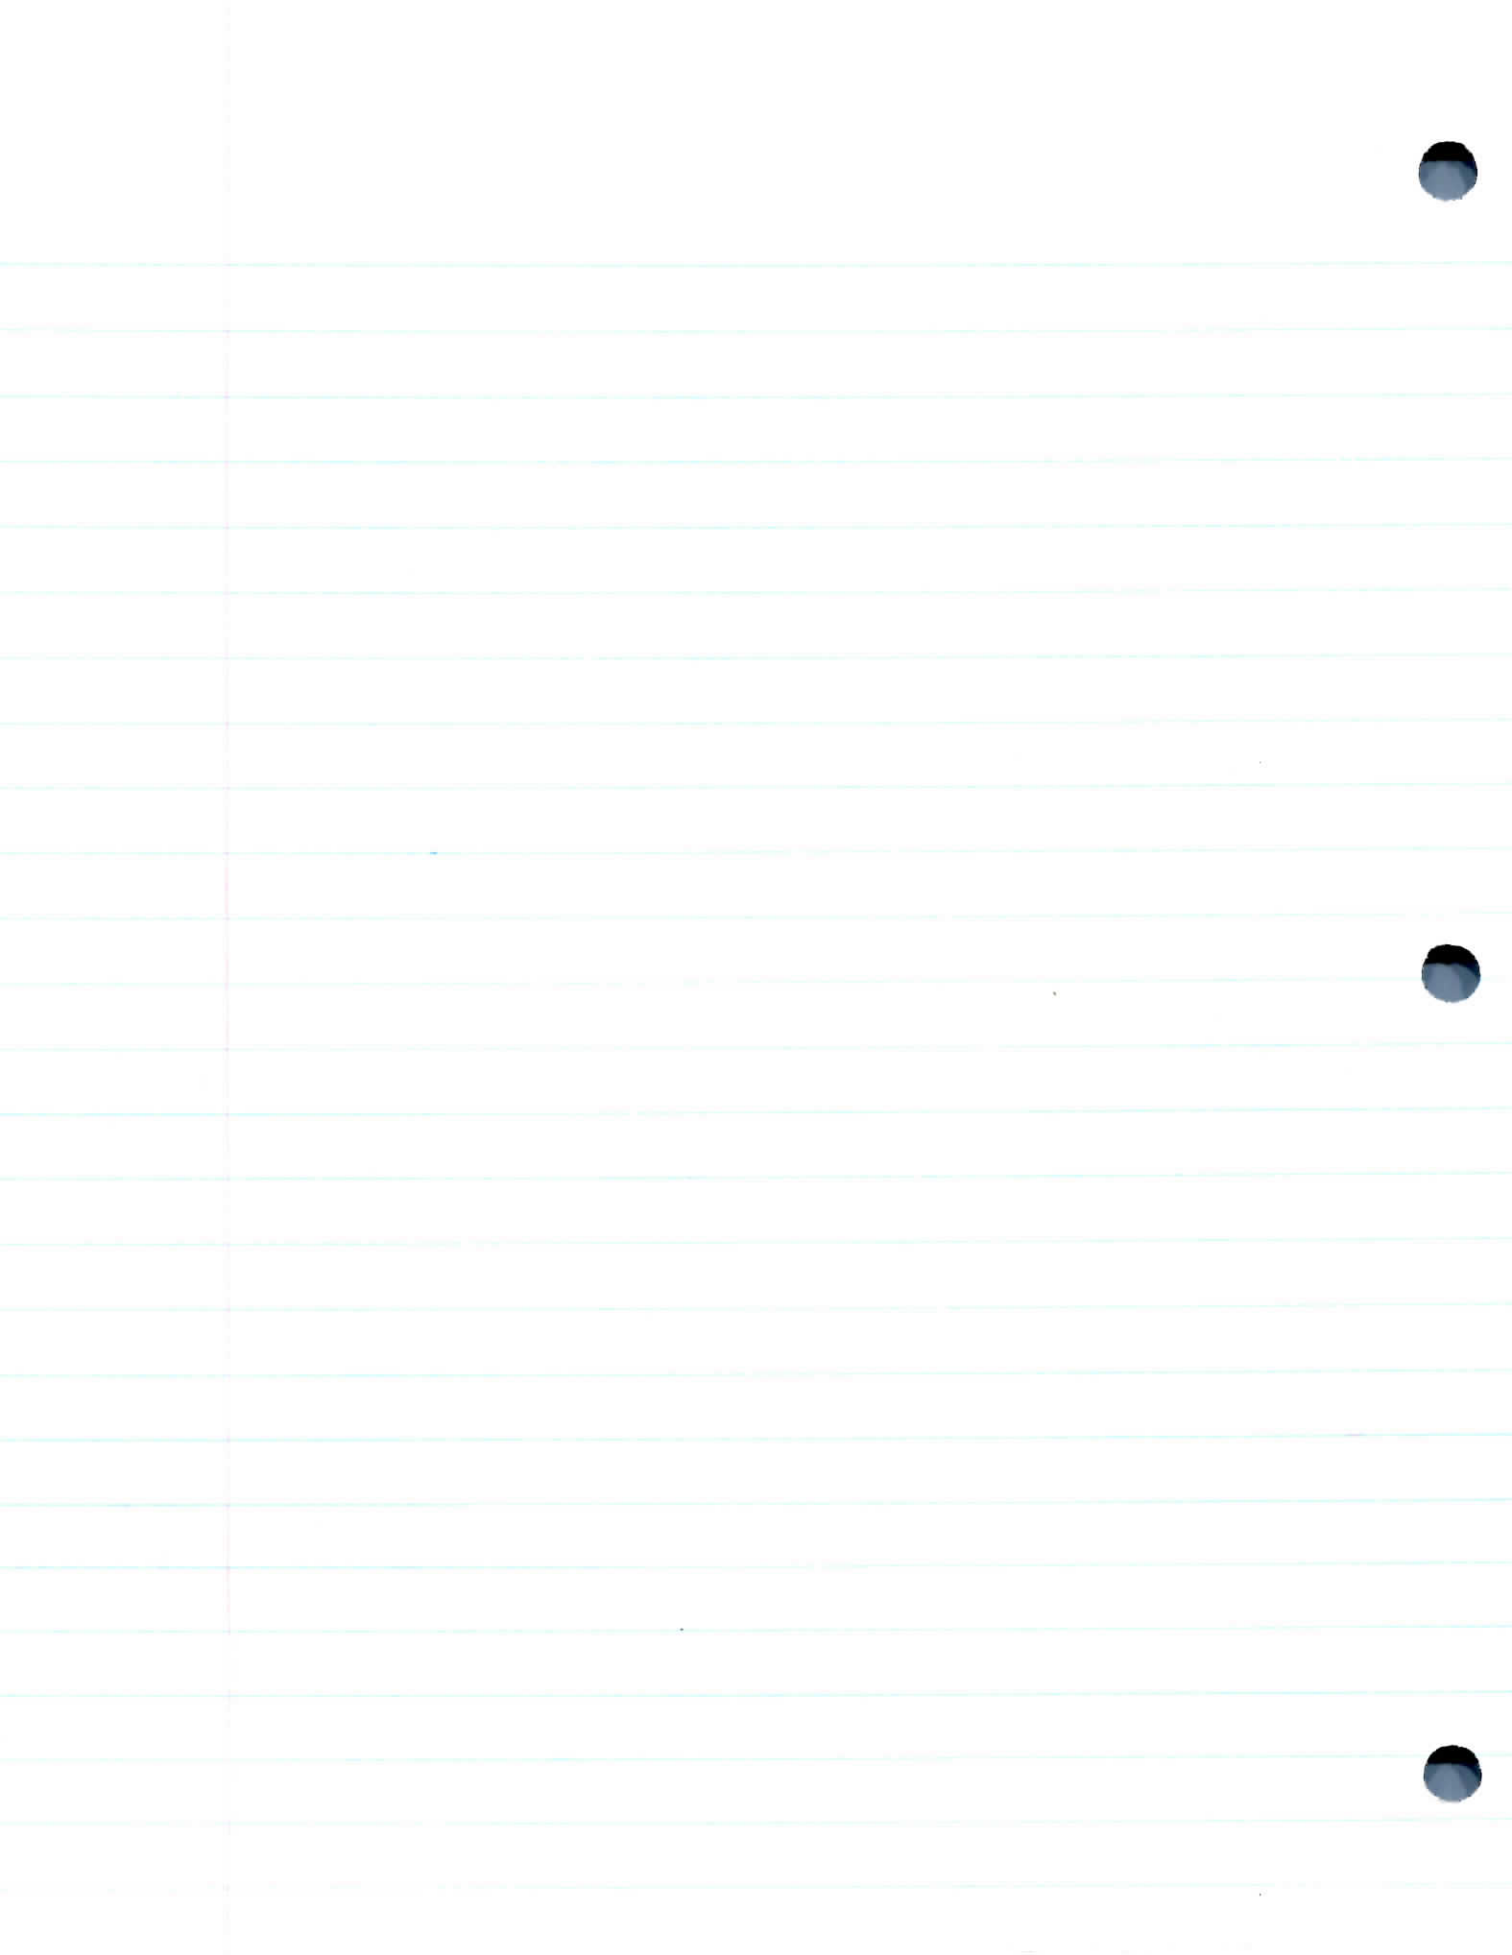

"The difference in the sperm and egg," Angelica had the scientific know-how of her father. "I reached an equilibrium in your sperm when I crystallized you."

"So which one is it?" Edmund asked.

"Why do you mean sperm of course," Angelica smiled and teased Edmund.

"If I didn't change it, you would've died from too much adverse sexual exposure."

"Oh okay," Edmund replied

## Chapter 88: Reassignments

Space Station Petya connected to the S.S.C. in a very complex operation of docking under the direction of.

Captain Sellers stood at the pressurizing chamber door and waited for some guards to open it up.

Captain Neff emerged from the chamber, "Hello Mr. Sellers."

"Have a good trip C. Neff," C. Sellers shook C. Neff's hand. The "C." means captain. It is the old title that means captain.

"Flying in a space zone, space-station is like leather. It's smooth."

"Let's just hope Petya lives up to its 514"

name, huh?" C. Sellers replied, "I know Colt has."

"Yes it has," C. Neff smiled. They started walking down a long corridor, "Where's the meeting bein' held at?"

"In the cockpit section," C. Sellers used a hand motion to invite C. Neff into the horizontal elevator. C. Sellers pressed the button for the cockpit section, "We have some extra people here. Three to be exact."

"Really?" C. Neff was looking forward to it.

The elevator stopped, "Here we are." C. Sellers opened the door and the two stepped out. They walked up a corridor and into the briefing room where they were greeted.

"Who we waitin' for, shi-?" Gort replied.

"A shut the fu-- up," Mike Speed ordered.

Johnny Smith and Charlene Eriksson Smith walked over to Astron, "What's 5151

up you two?" Cestron hugged Charlene and then Johnny. They were the best of friends.

"So this is the third Space Station Cobb, huh?" Charlene asked.

"Yeah, but don't remind. Those were big as-fu--ups," Cestron shook his head.

"This really looks like the second one, the one we crashed in the Atlantic," Johnny deduced.

"That shi-- got us thrown in the fu--in' looney bin," Cestron said, "but this is that space station, Gison's son fixed 'er up."

"So what's goin' on 'Caster Oil'?" Charlene asked.

"Oh nothin' much. Just fu--ed up some aliens and coolin' out with my son and his family."

"Where is your son?" Charlene was curious.

"Edmund!" Cestron called as Edmund walked up.

"Shi--! Put my fu--in' ear out,"

Edmund held his ear.

"This is Johnny Smith and his wife Charlene who was almost your mother," Castro introduced them.

"Hello," Edmund replied. "This is my girlfriend Angelica."

"We've heard," Johnny smiled, "you've been through quite a lot."

"Your father tells us all about it," Charlene replied.

Billy walked over, "Uncle J and Aunt Charlene? What are you doin' here?"

"We came to see -," Charlene was interrupted to see her daughter Erica walk in followed by Gerry Garrison.

"Go on," Angelica said softly to Edmund.

Edmund walked over to Erica and hugged her, "Welcome back."

"Great to be back," Erica smiled.

"I did it," Gerry told everyone. 517

"Hi Mom, hi Dad," she hugged both of her parents who she hadn't seen in years. Johnny and Charlene had tears in their eyes.

"Now can we start the fu--in' meeting?" Galt asked.

"That's gotta be Galt's son," Johnny sat at the table.

"How'd you guess?" Acro asked.

"Alright, let the meeting come to order," Deen replied, "I'll make this short and sweet."

"Hold it!" Scott Gipsword's voice sounded.

Edmund went for the gun but Angelica grabbed his arm, "who the fu-- let him here?!!"

"Step back before you get fired," Mike Mason, Scott's only Secret Service man ordered.

"I'm back," Scott had a grin on his face.

"But we got rid of your as--," G.A.S. stood up.

"I'm out on a technicality," Scott replied, "besides, our country needs a Vice-President. I've also never been impeached. My term is still on."

"I knew we forgot somethin'," Gart clicked his fingers once.

"Will you shut the fu--up," G. & G. ordered.

"Woah, cool out," Scott explained, "it'll never happen again, I promise. I know I've hurt a lot of people. I put Edmund's fanny through a lot of unnecessary shi-. I put Gart and Sellers in the hospital. Nearly killed Edmund, and almost ruined my family name. My family feels strongly about honor. That time in the pen., gave me time to think about my mistakes."

"Now sit down and shut the fu--up," Gart scratched his penis.

"I'm about to kick your fu--in <sup>519</sup>

as-, "Willy G. was getting angry.

"Well if that's the case Scott,"  
Deen replied, "we're glad to  
have you back."

"Thanks, no bit- is worth  
what I went through."

"Oh I'm not?" Cathleen asked  
herself on a Dowdian mother-  
ship.

"You'll have your chance to get  
back at him," Commander patted  
Cathleen on the back.

"What about me?" Jordan asked, "I  
want Jerry and Gert to die."

"Yes, they did invent ~~really~~  
take you off of life support,"  
Commander lied, "didn't they."

"Let me go da--it! I have to  
clear my fa--in' name,"  
Ricardo ordered.

"I acted out my part, way  
to well," Steve bragged.

"Yeah, even though he is a  
bumblin' oaf, he has had good

times, "Claw replied, "You had his my son. You Doctons really are cool people. I guess that's why I gave you the tube technology."

"You're a great scientist," Commander praised.

"Aye when are you ever gonna bring him out of there?" D.D. pointed to a very old tube.

"Who?" David Majewski asked.

"Ah, John Smith, that's an interesting story," Claw grinned.

Commander ordered, "Our spy is already setting up the plan. We'll soon be rid of the Space Force. Our League of Aggressors is really a great thing."

"I think it sucks sti-!"

Jeremy had the same story as Erica Smith, with the clone and all.

On the S.S.C.

"Who let this mother fu--er in?" (50)

Cestron pulled out his laser and aimed it at Cairce.

"Dad mo!" Edmund ordered as he grabbed Cestron's arm.

"That's right," Charlene agreed with Edmund's actions.

"I'll do it," Johnny got Cestron's gun.

"I wouldn't," Cairce pointed at a sheet he held up, "I'm out on technicality."

"He's fu--in' dejavu," Gort replied. No one shut him up.

E.J. walked over to Cestron with M.J., "Who's he?"

Cestron answered, "He's the biggest fu--in' dick in the world."

"I guess you don't like him," E.J. replied.

"May we please continue with this seemingly short meeting?" Deen had lost his patience. "Okay, sit down. Your new assignments are as follows. 500

Acro, Billy, Cairce, Gort, Erica, Jerry and Mike will join C. Neft aboard Space Station Petya. The rest will be here. Would you two like to be reinstated?"

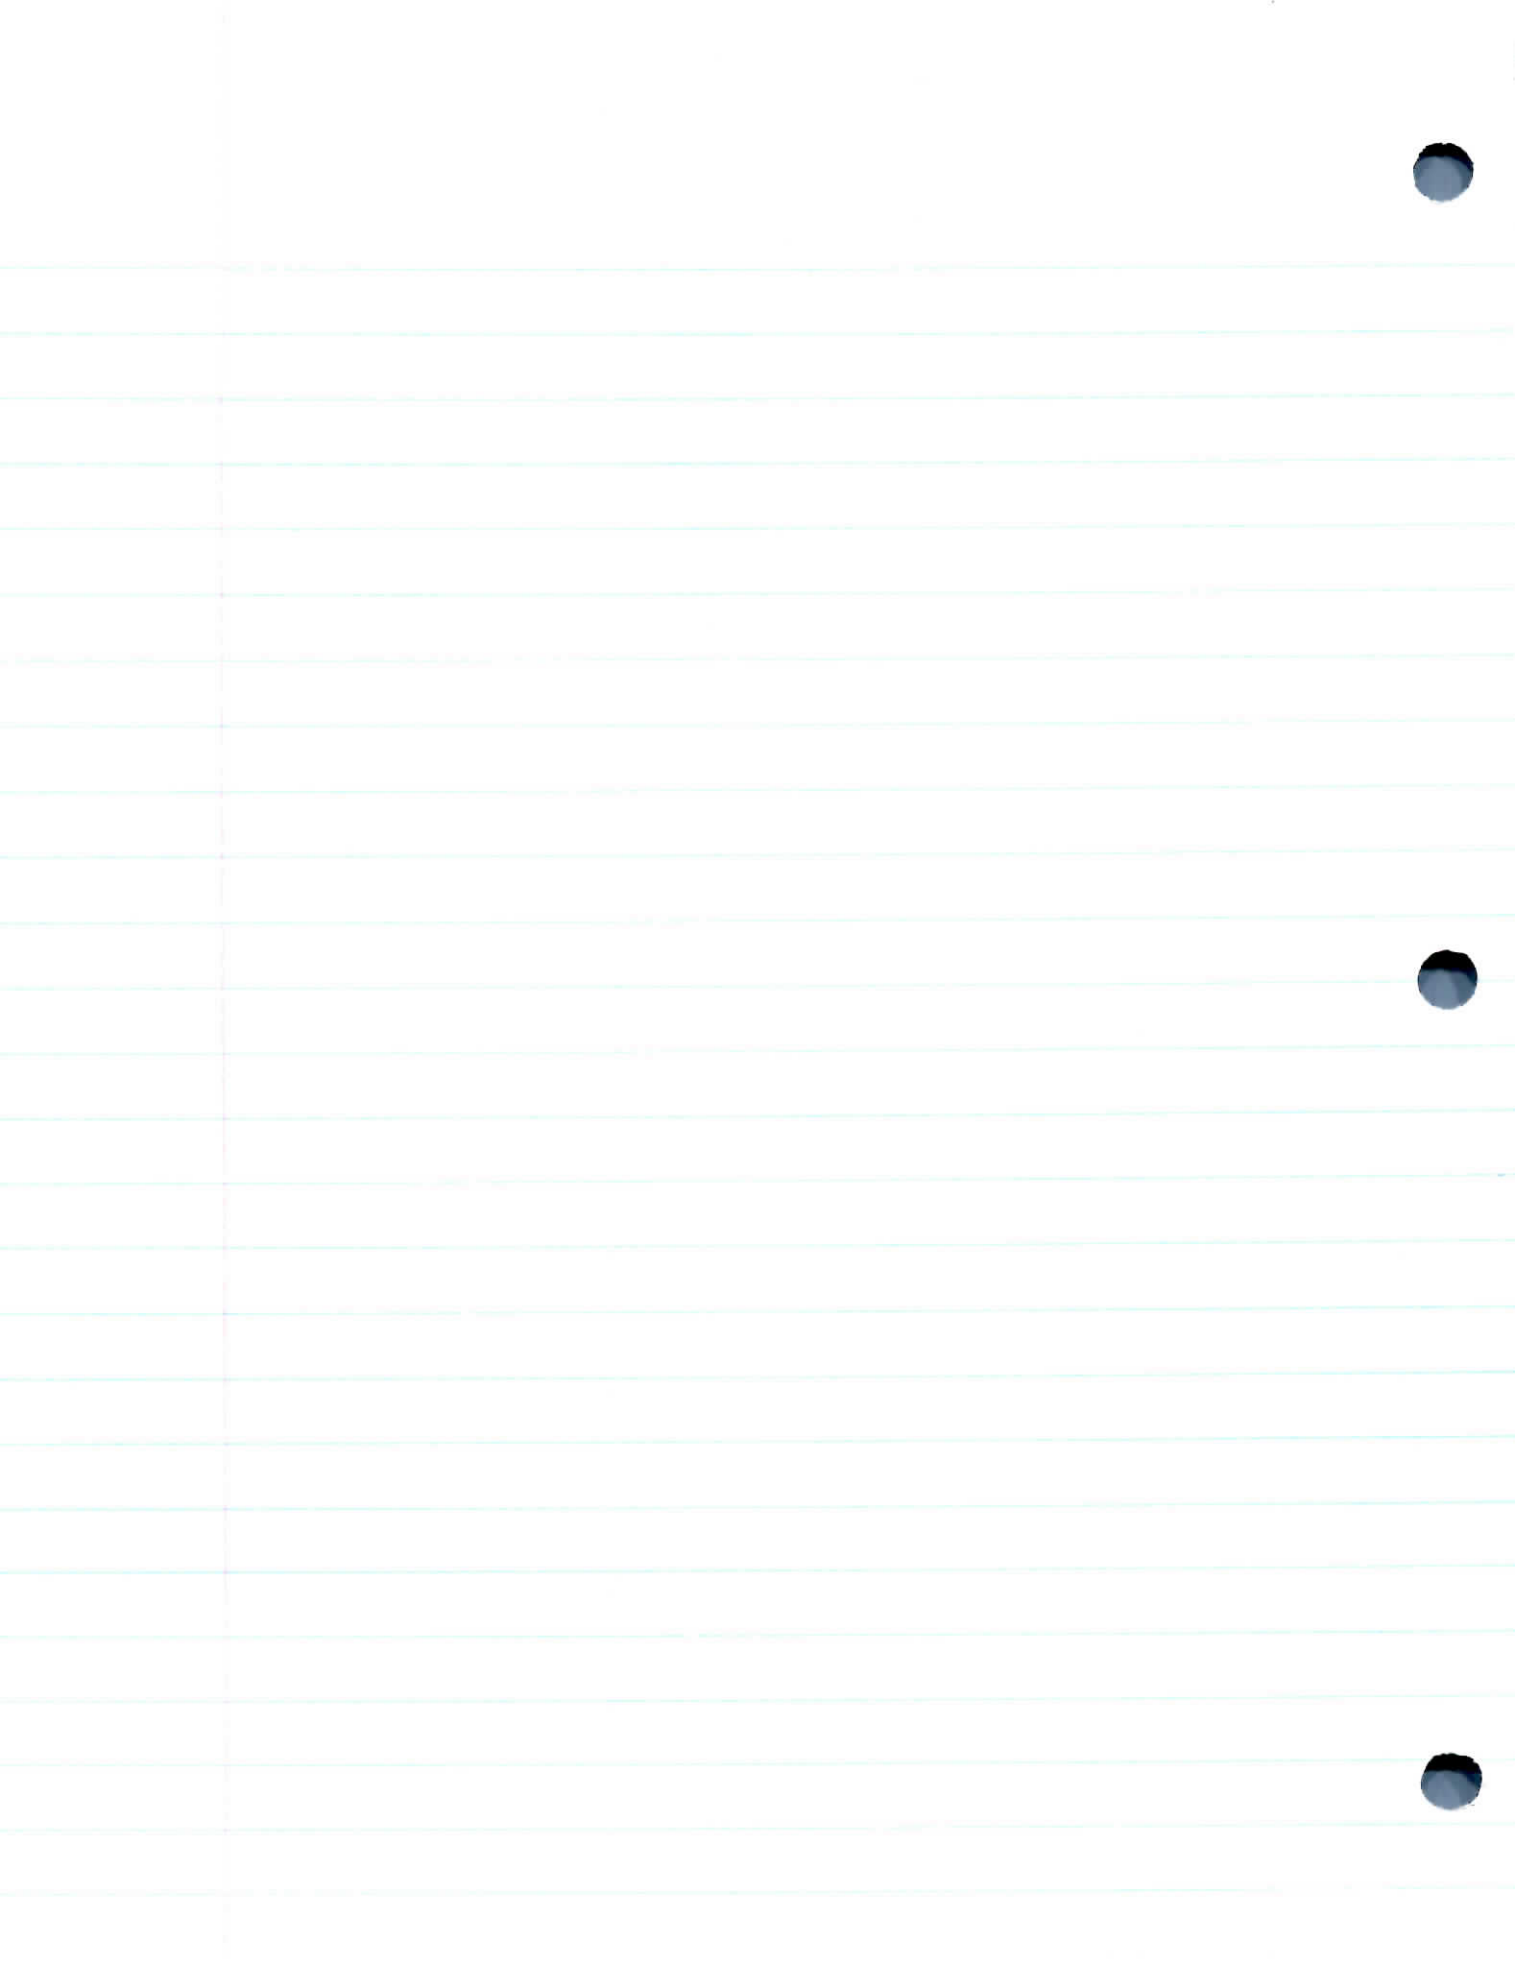

"Not really," Charlene answered for both. They were distraught. Their daughter would be going away again.

Deen continued. "Okay then. Acro, Billy, Gort, and Erica, when you decide to go back against the Corporation, you may, but NOT now. Go on get aboard your new station. Scott and I are going back to Washington."

"That's gotta be Dam's son," Charlene replied.

"How'd you guess," Willy G. said.

## Chapter 89: Sabotage and Aggression

"You can't do this Commander,"  
Matt pleaded.

"Oh I can," Commander replied.

"I'd advise you to stop. The  
Space Force'll end up killing you,"  
Mimla hoped,

"I'd advise you to shut the fa-  
up," Glove put his claw up to  
Mimla's face.

On the S.S.P....

"30 minutes out to do it," Cairce  
replied. He ran to the cockpit  
section and witnessed the detaching  
of the S.S.P. from the humongous 5d41

D.S.C. "I'm homefree now."

On the Doroan mothership...

"What did you do to my father anyway?" Ricardo was curious.

"Heaven, before I was even born, had these two alien Doroanians Sofar and Standon reprogram him, permanently. We almost took over the earth but Edmund's father and his friends stopped the attempt. They did not know about us back then though."

On the S.S.P....

Cairce snuck stealthily to the docking bay and boarded a ship.

"Aye where are you goin'?" Zart asked.

"None of your la-n business!"

Cairce pulled out a laser and fired.

Zart dodged the laser blasts.

Cairce took off.

"Come back here mutka fu--er!"

Zart ordered while boarding another <sup>5251</sup>

ship. Fast too launched.

"Senny ran into C. Neff's office,"  
"there've been two unauthorized  
launches sir."

"Do you know who it is?"  
C. Neff asked.

"No sir," Senny answered.

"Notify the S.S.C. and set an  
intercept course," C. Neff ordered.

On the Dorodan mother ship...

"Arm all laser banks,"  
Commander ordered.

On the S.S.C.

"Sir," a panelman called to  
C. Sellers.

"Yes what is it?" C. Sellers  
answered.

"We're under a full scale  
attack!" the panelman was scared.

"Shields up! Take evasive  
action," Sellers ordered. "Launch  
some fighters. That mother-  
ship is mother fu--in' huge. 506)

"How can we stop it?"

"You don't," Commander came on the big screen. "We have the capacity to blow up half of your world. Surrender."

"Awe fu-- you!" Edmund pushed a button to disconnect his ship from the transmission. Edmund, Angelica, Cestron, and Willy were in fighters ready for action.

"Do you guys and one gal need anything?" Johnny asked.

"Yeah," Edmund suggested, "take the bids to Sheriff Posh in San Francisco."

"What about me?" Beavry asked.

"Come in my ship, Cadet Beave," Willy suggested.

"Is that all you need?" Charlene asked.

"Round up the rest of the guys," Cestron ordered, "we're gonna need a whole fu--in' lot more than what we have."

They all took off while the 500

S.S.C. was taking evasive action.

On the mothership...

Commander ordered, "Cathleen, Jordan, David, and D.J., take out the president, vice president, if they have one, and get my daughter. Launch the fighters. I want them alive." What Commander said were fighters were smaller daughterships that the Dorodans had used in the past.

On the S.S.P. ....

"All the channels are closed off Sir," Mike replied.

"Shit," C. Neff was upset, "we'll have to do it on our own, then. Get everyone in the briefing room."

The S.S.P. landed on a strange barren planet.

"Is everybody here?" Billy asked.

"All except Sart and Cairce," Aero <sup>5287</sup>

answered.

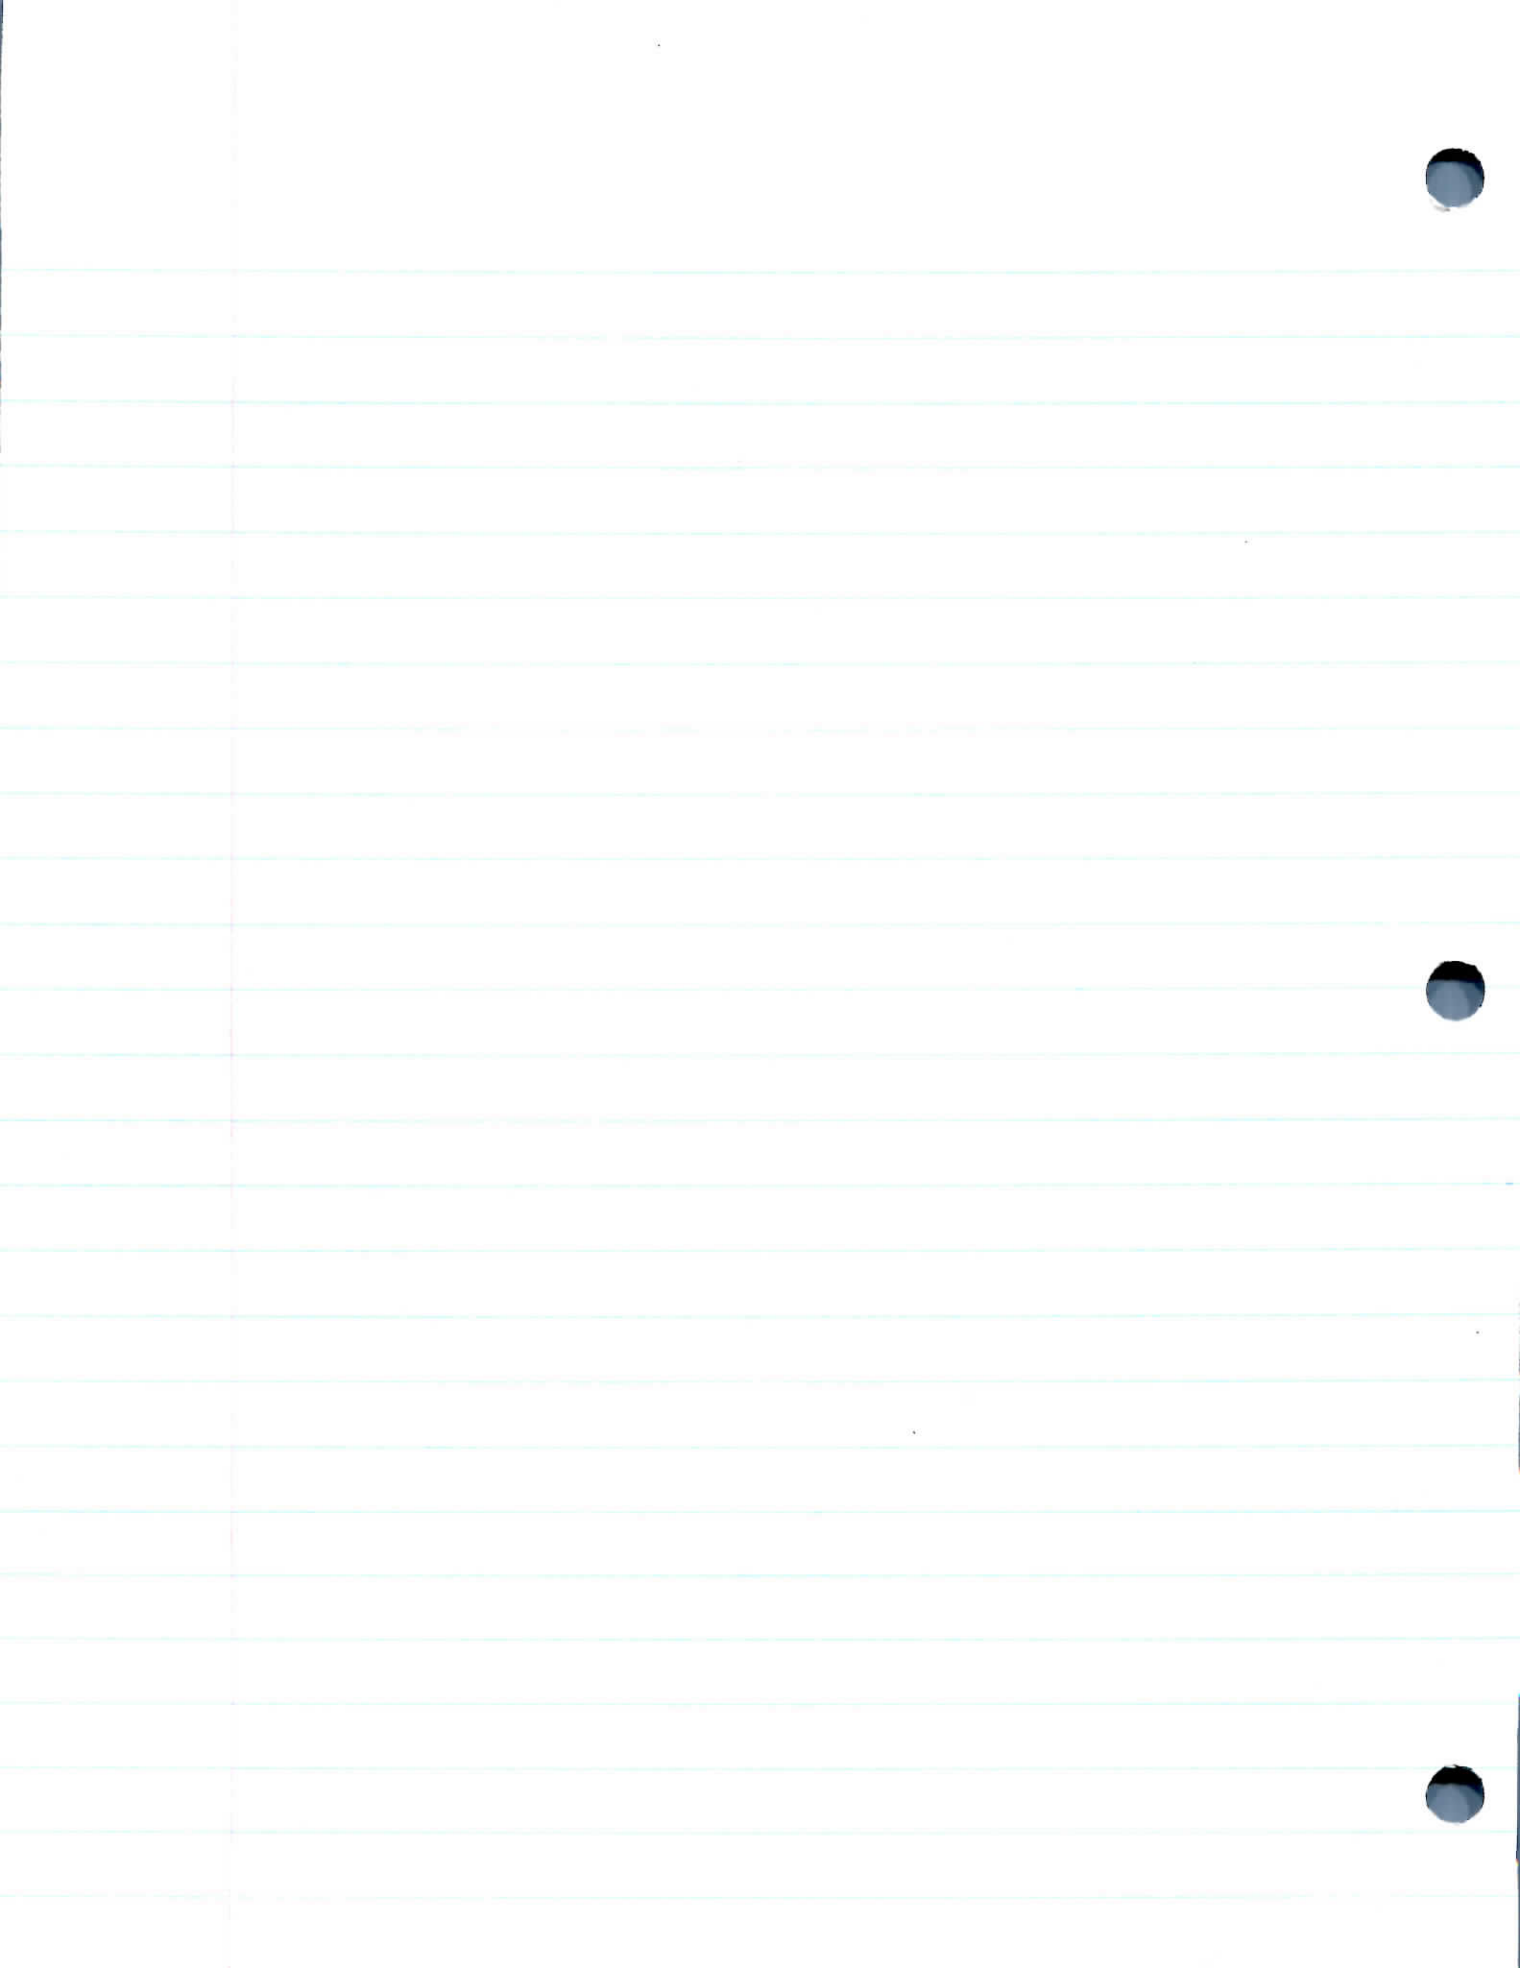

"What's the plan?" Erica asked C. Neff.

"Launch the fighters, I guess we go in," Cairce suggested.

Five minutes after the fighters were launched, the S. S. P. blew up.

"Shi-!!!" Billy, Erica, Mike, Gerry and C. Neff exclaimed. Aero was more self-contained.

## Chapter 90: Captives in the Game

Inside a mountain on the planet...

'Fart was on his knees trying to fight the knockout gas coming from Standon.'

"Don't try to fight it," Sofar suggested, "it's inevitable."

Fart fell out unconscious. Cairce strapped Fart into Sofar. Standon injected a thick yellow fluid into Fart's brain. Sofar sprayed a plastic coating over Fart. Fart was completely covered. The plastic coating hardened. It was shiny and to the skin as well as even.

"Standon," Sofar called.

"Yes master," Standon replied.  
"He is ready for delivery to  
Commander," Sofar announced.

"I'm gonna go check out the  
terrain," Billy said.

"Me too," Gerry agreed.

"The rest of us will try to  
get back to the S.S.C.," C. Neff  
announced.

"We will?" Erica asked.

"Yep," C. Neff clarified his  
past statement.

Gerry and Billy landed.

"You search the west," Gerry  
suggested.

"Alright, meet me back here in  
an hour," Billy synchronized his  
watch with Gerry's.

Gerry walked for a while and  
found "Fart's and Cairce's ship,"  
Cairce, "what's goin' on, ahhh!"

Billy found the entrance to the  
mountain. He ventured in to find

Fart and Jerry in the plastic coverings, "What the fu-- is goin' on?"

"This, son of Commander and Geove," Standon, if he had a face would have a grin on it, "I won't put you in these two's conditions. Your father's waiting for you. Five Dorodan guards helped put the crystal cuffs on Billy. In his heart, he believed Standon, but he didn't seem to understand it.

In the planet's outer space...

"Jason Neff," a voice called.

"Who is it?" C. Neff was scared.

"Just lil old me," a beautiful blond wearing all black appeared on C. Neff's lap.

"What do you want?!!" The alien put her arms around C. Neff and kissed him until he was numb and horny, "Who are you?"

"I'm Lauricia, and you're my sex slave," she announced.

"Oeff!" Erica called, "Are you still there? What's goin' on?"

"It's your turn Aero!" Lauricia explained.

"I'll never give into you," Aero said.

"Wanna bet?" Lauricia's fingernails grew out and she scratched Aero injecting a spore into him draining his sense of duty and will power. She then kissed him numbing him and making him horny.

"Who are you, Aero couldn't stop kissing her."

"My name is Lauricia Kim."

"How has it gone Lauricia Kim?"

The Space Vampire woman was somewhere in space.

"Ex-cellent," Lauricia replied "I'll get the girl," the Space Vampire agreed, "she shouldn't be tough."

Erica put on her jet pack and

helmet. The Space Vampire appeared in her cockpit, "Competition, get the fu-- out!" Before Erica fell into the vampire's power, she opened the cockpit and kicked (literally) the vampire out.

"Come back here!" the vampire. Erica used her laser on him, "I know you hate heat." She knew all about space vampires, "your type of skin is too sensitive."

"That's why you crave human blood, preferably the opposite species. It satisfies your urge, or should I say your Pm's all the time."

The vampire was mad. He flew after Erica. Erica got into her ship and turned on the thrusters. The heat fried the Space Vampire to a crisp (literally).

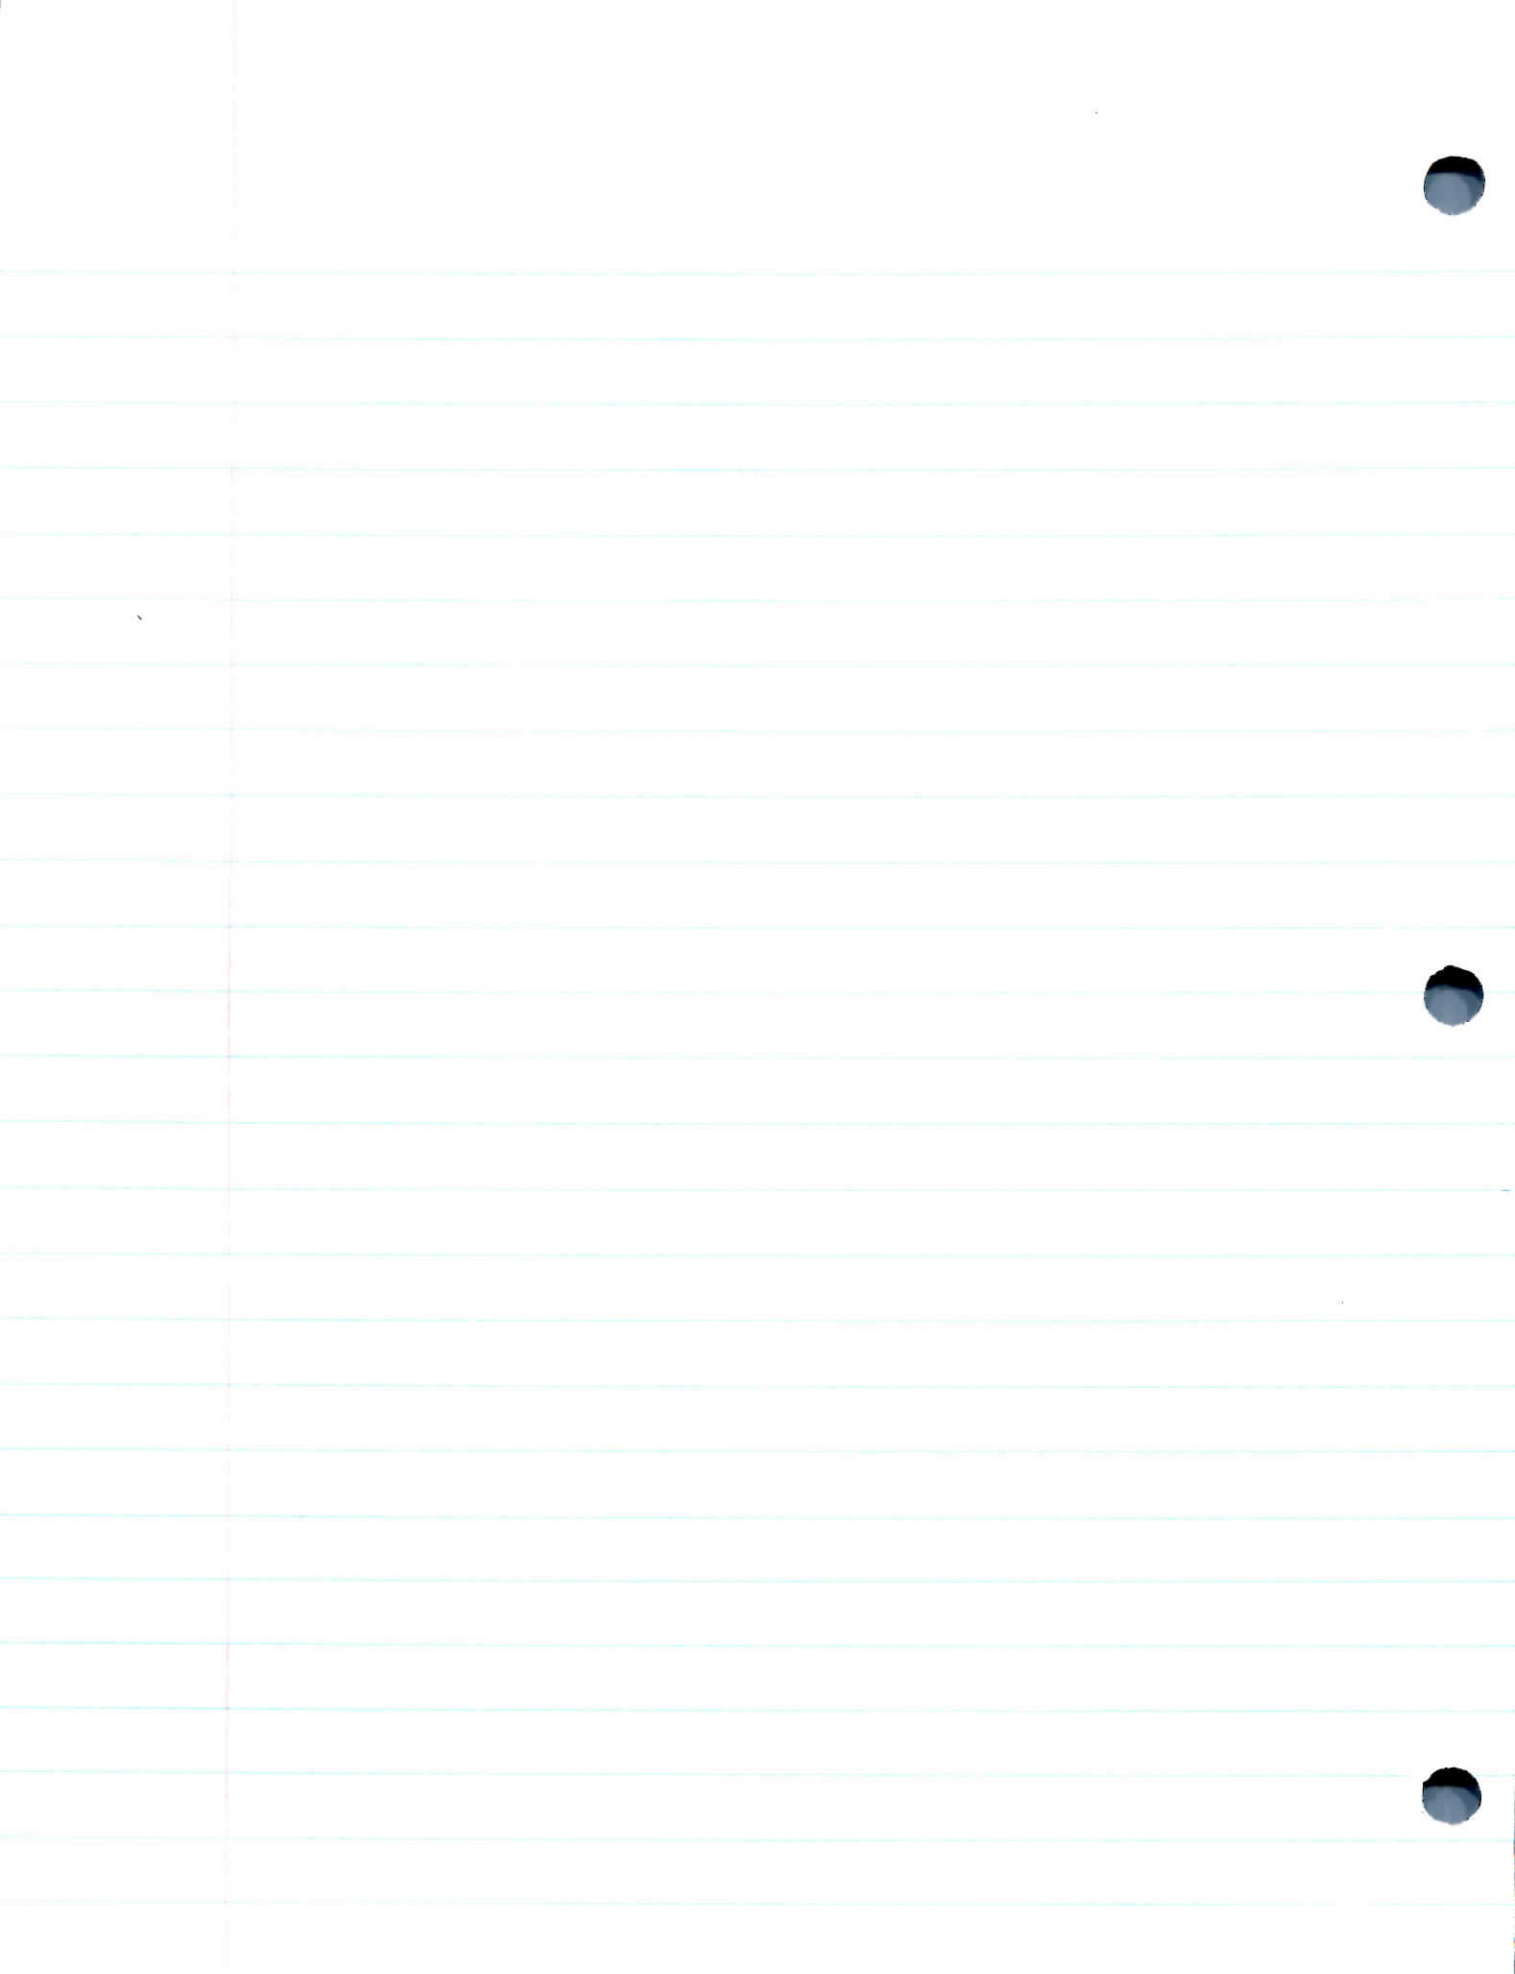

"Nooo!" Lauricia yelled as she picked up the crisp and flew off, "More regeneration. I'll return."

Erica used her computer to

set Acro and C. Neff's ship on  
auto pilot. They went on.

"Now what was her name for  
the record?" Erica asked, "I better  
get a Ferrari like Edmund for  
this shi- I do."

## Chapter 91: The Reunion

On Earth...

"How you guys doin' up there?"  
Johnny talked into his communicator.

"How the fu-- do you think were doin' taken' on space stations you dumb mutha fu--er!" Astron and the rest were in a lot of trouble.

"Who should we get first?"  
Charlene asked.

"Seems like they need Astron,"  
Johnny got in the car with his wife.

On the S.S.C.

"Blowe, Jordan, and Catherine materialized" <sup>30</sup>

in the docking bay.

"Why are we here?" Jordan asked

"We need the plans for the S.D.C." Glove clarified.

"Well you're not gonna get 'em!" K.D.Y. unloaded and then stopped, "Cathleen Cooke."

"You remember me," Cathleen jumped on K.D.Y. They fought Jordan took on K.A.Y. Glove slipped away in the confusion.

"Hey, stop," a guard ran up behind Glove. Glove flipped over the guard and stuck him in the back. It was instant death. More guards fired at Glove. He ran to an elevator which had Mrs. Dike inside.

"Get outta there!" C. Sellers ordered.

"Wait, what's going on?" Mrs. Dike was soon grabbed by Glove.

"Don't fu-- with me!" Glove threatened.

"Put me down, let go!" Mrs. Dike

kicked and struggled.

"You don't get it, do you bitc-!"  
Glove hit her over the head  
knocking her unconscious.

C. Sellers took his communicator,  
"Get back here, Mrs. Dike is  
in trouble."

"Who gives a fu--," Cestron  
said.

"Cestron!" Angelica replied.

"We might as well," Willy  
explained, "we're getting our  
as-es kicked."

Erica, Aero, and C. Neff flew  
in with a shuttle. Johnny, Charlene,  
Arison Garrison, Gibson Garrison,  
Grease Monkey, and Sped Strong  
emerged from the shuttle. Cestron,  
Edmund, Willy, Beavy, and Angelica  
come in.

"What's up?" Grease Monkey  
asked.

C. Sellers updated them, "The D.D.C.  
shields are down and we're getting  
our as-es kicked out there. We need 5387

fire power. We need a fu--in' miracle."

"Well you got one, we stick together," Arison announced.

Grease Monkey, the strategist spoke up, "We need some people to infiltrate that base. Others have to go get our guys. Some gotta get this base workin'."

"Where the fu--in' fighters, I've been itchin' to get into some juicy as-action!" Arison announced.

"I'll infiltrate," Angelica agreed.

"Me too," Charles agreed.

"Count me in," Johnny agreed.

"Fighters," Edmund replied.

"The ship, definitely," Brian said.

"My ship," C. Sellers agreed.

"The planet," Evca agreed.

"Planet," Sped Strong replied.

"Planet," Cestron agreed.

"Fighters," Willy replied.

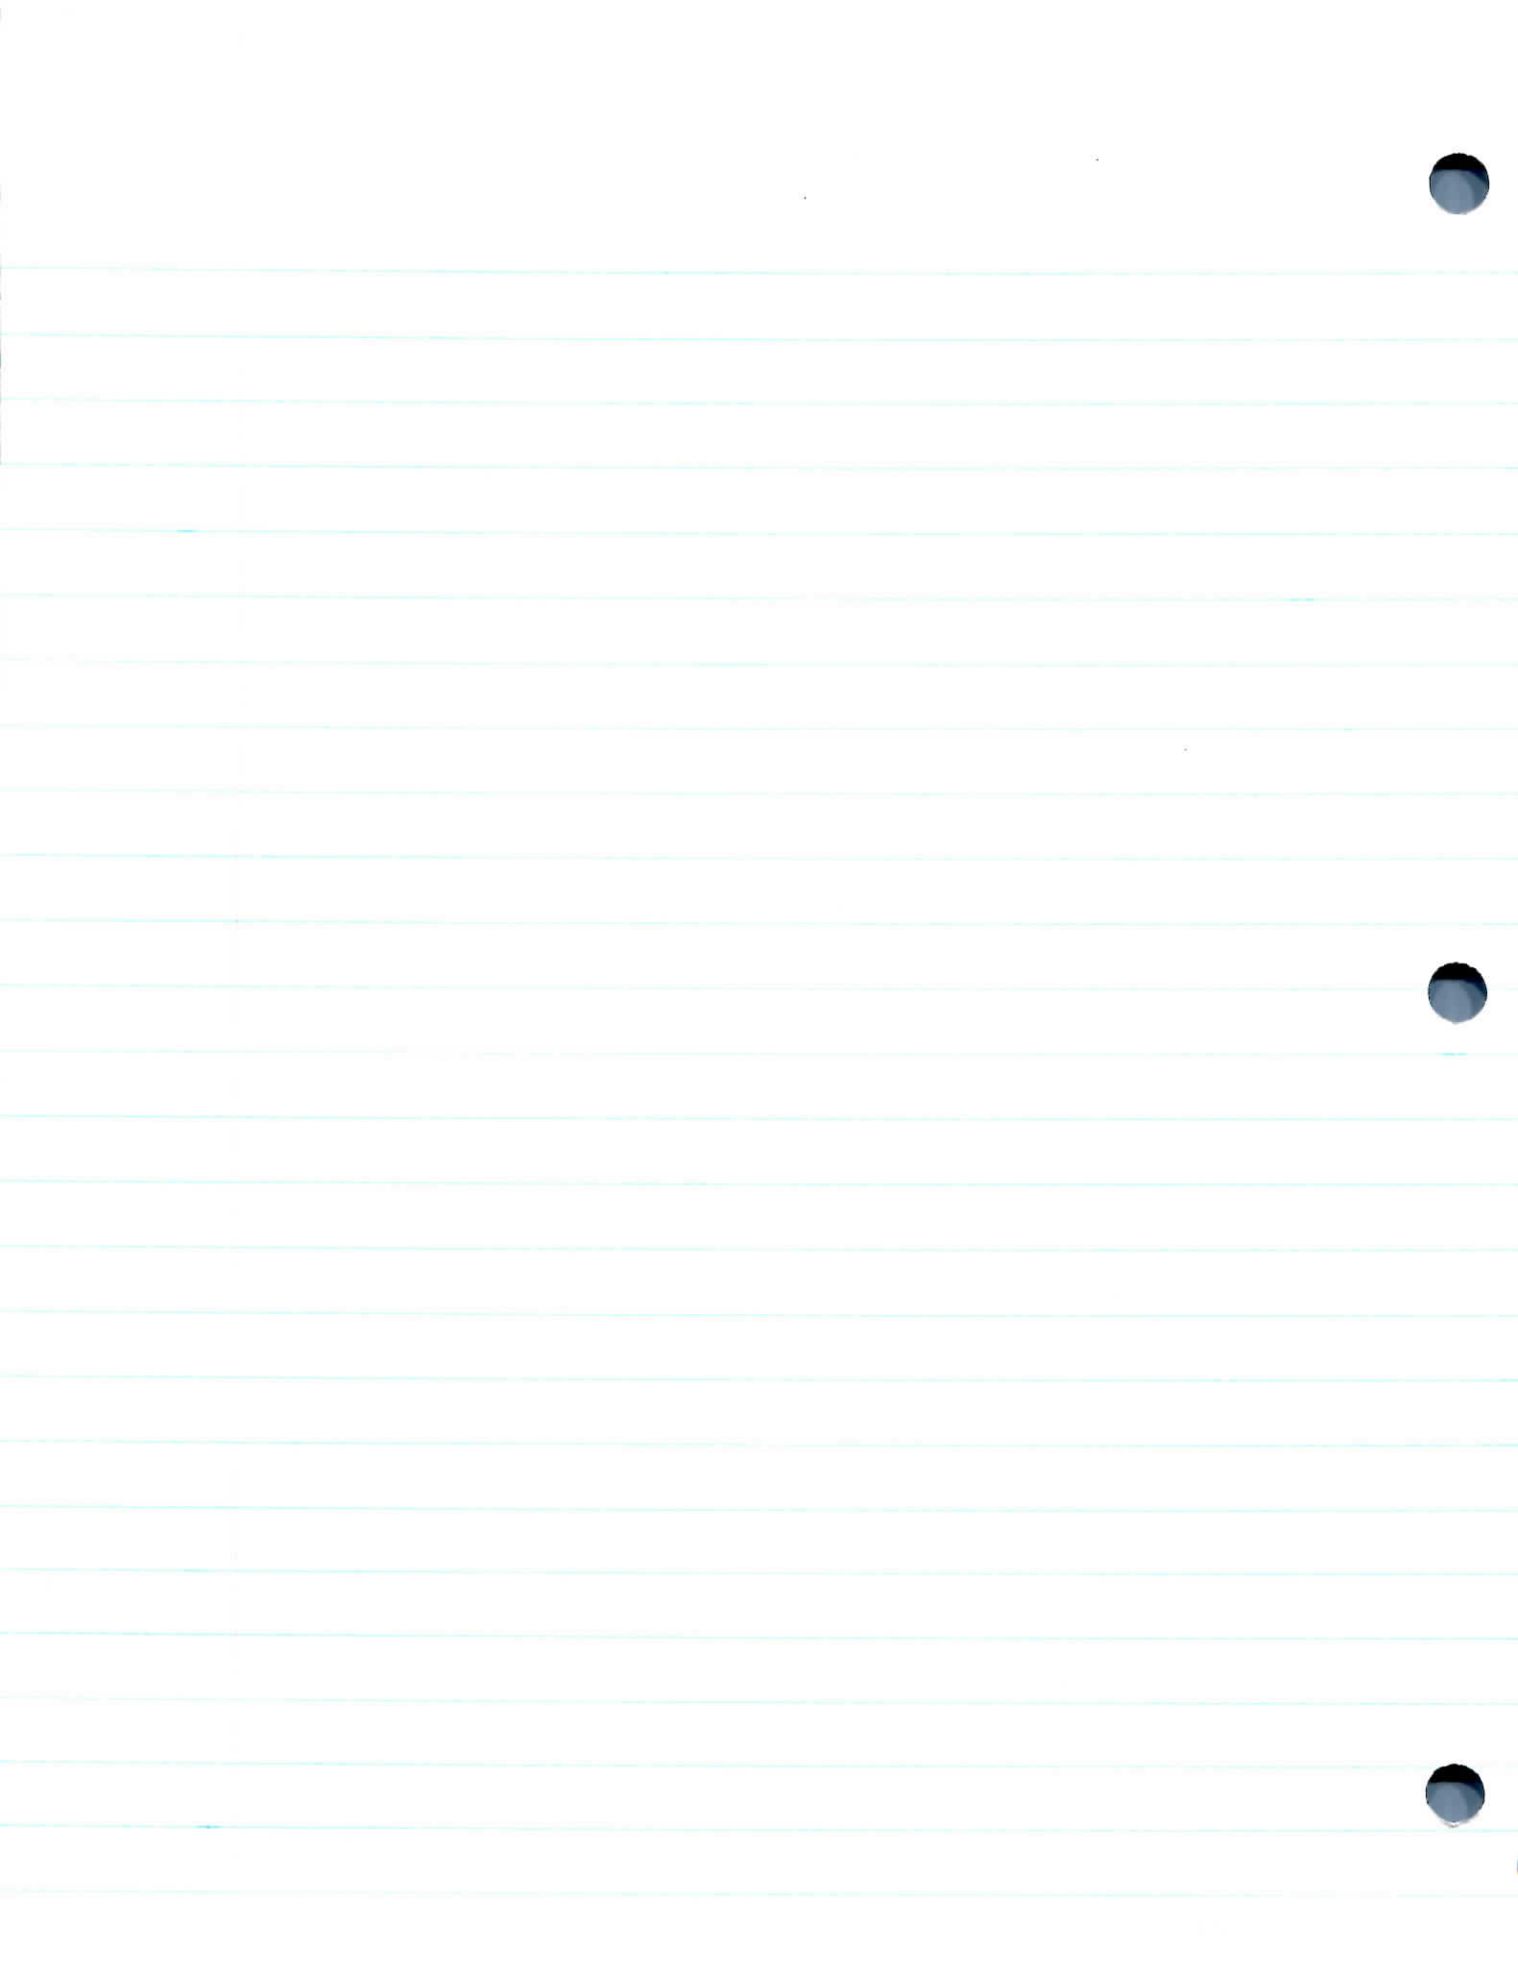

"I'm with Willy," Beavy said.

"Ship," Grease Monkey concluded.

"Move out," C. Sellers ordered.

## Chapter 92: Infiltration

"Do not have the fighters move out until the infiltration has finished," Grease Monkey advised.

"Okay, you got it," C. Sellers agreed.

"Good luck," Edmund hugged Angelica.

"Don't worry about me, you got the hard job," Angelica boarded a shuttle with Johnny and Charlene.

"Woah, where's East?" Astron asked.

"He had to get some old weapons," <sup>540</sup>

Charlene said as the shuttle door closed. The shuttle took off slowly.

With the fight...

Ms. Dibe, R.D. G., and T.D. G. were all in the plastic coatings.

"I got the plans," Stone announced as he hotwired another space zone shuttle. They escaped as lasers followed their path.

"Did you stop them?" C. Sellers asked.

"Does it look like we fu--in' stopped 'em?"

"Oh shi-!!!!" Gart yelled as he flew in and crashed.

"You dumb fu--!" Sped Bereng said.

"I got some Gart bombs and some more shi-," Gart dumped a big, big bag of ammo and munitions.

"I guess he's goin' to the planet," Cestron patted Gart on the back.

Suddenly a daughter ship came and crashed into the space station.

"Those fu--ers play dirty," Gart deduced.

"No shi-," Cestron said sarcastically, "now get this shi-off o' me!"

"Oh sorry," Gart started pulling rubble off of Cestron.

"You alright C. Sellers?" Sped Strong asked.

"Yeah, but are we all?" C. Sellers replied.

"Time out," Sped Strong asked, "where the fu-- is this blood comin' from?"

"It could be from Grease Monkey," Gart pointed at the bloody Grease Monkey.

"Well bleed to death!" C. Sellers was scared.

"Not if I can help it," Sped Strong picked up Grease Monkey. (542)

"How many times have I done this in the past?" Sped Strong sped off.

In the sick bay...

"What the fu-- was that?" Gison asked Sped Strong.

"Gamabangi fighter," Sped Strong ran off again, "take great care of him."

"Don't I always? No shi-, people are always gettin' hurt," Gison said to himself.

Cestron, Sped Strong, and Gart took off for the alien planet.

"I'm tired of this fu--in' waitin', action!" Gison was gettin' upset.

"No shi-," Willy agreed.

"Yeah!" Beavy tried to fit in.

"I have the urge to bick some as-," Edmund replied.

On the mothership...

"Fire lasers at the S.S.C. on my command. It's time to say

goodbye. Get ready to take all the prisoners to the planet. Put Marikwa's mother in the crystal cage," Commander was calm and collective.

Angelica, Charlene, and Johnny found the cells.

"You guys free everybody, I'll be back," Angelica hoped.

She knew her mother was here. Angelica armed her U-gun.

Johnny opened up an old crystal cage, "Father? No-shi-."

"What's up Johnny?" Charlene saw Mr. John Smith. They had finally freed him.

"But you won't live to tell about it," Claw stepped up.

"I'm gonna kick your fu--in' ass-Claw," Johnny threatened.

"Take your best shot. I'm as sharp as ever. Ruk, I made a punny," Claw teased Johnny.

"afire," Commander said firmly. The mothership powered up and fired at the S.S.C. It was a deadly and direct hit.

"Gooo!" Angelica felt Edmund's pain.

On the S.S.C.

"Move out!" Arison held Edmund up, "I have those fu--in' Doodans."

Edmund got into his fighter. Willy helped Beavy into his own. "Are you sure Willy."

"It's only your life," Willy said sarcastically. Willy boarded his ship and they all took off.

"The reason why y'all fu--ed up is 'cause you don't concentrate your fire on one target. All four took out All of the Daughterships by using Arison's strategy.

"Sellers!!" Gison called. Sellers  
lied in a bloody pool. Gison saw  
the mothership turn for a  
second shot but it stopped. A shuttle  
was docking.

"Hold on Sellers," Gison replied, "  
hold on old buddy. I really didn't  
want this to happen. Come on Johnny,  
get your as - outta there!"

On the mothership.

"Die Smith!" Claw sliced at  
Johnny. Charlene freed Matt,  
Mimla, Jeremy, and Ricardo.

"You got some fu--in' guns?"  
Jeremy asked.

"Of course," Charlene replied, "  
don't leave home without 'em, you  
never know when you'll need 'em."

"She's cool," Ricardo said.

Johnny was on the ground blocking  
Claw's thrusts with his uzi.

John Smith jumped Claw and  
started beating him up.

"What the fu-- is with you?" Claw <sup>540</sup>

was astonished.

"I told you when you first captured me you'll never win," Mr. Smith punched Claw.

"Su-- you!" Claw kicked Mr. Smith off of him and Johnny jumped back on him.

Charlene listened to her communicator, "This is Gison get your as--es outta there now!"

The Smith's let off of Claw. Claw was half dead.

"That's for my mom and dad," Johnny walked off with his father,

With Commander...

"I sense my daughter Angelica," Commander deduced.

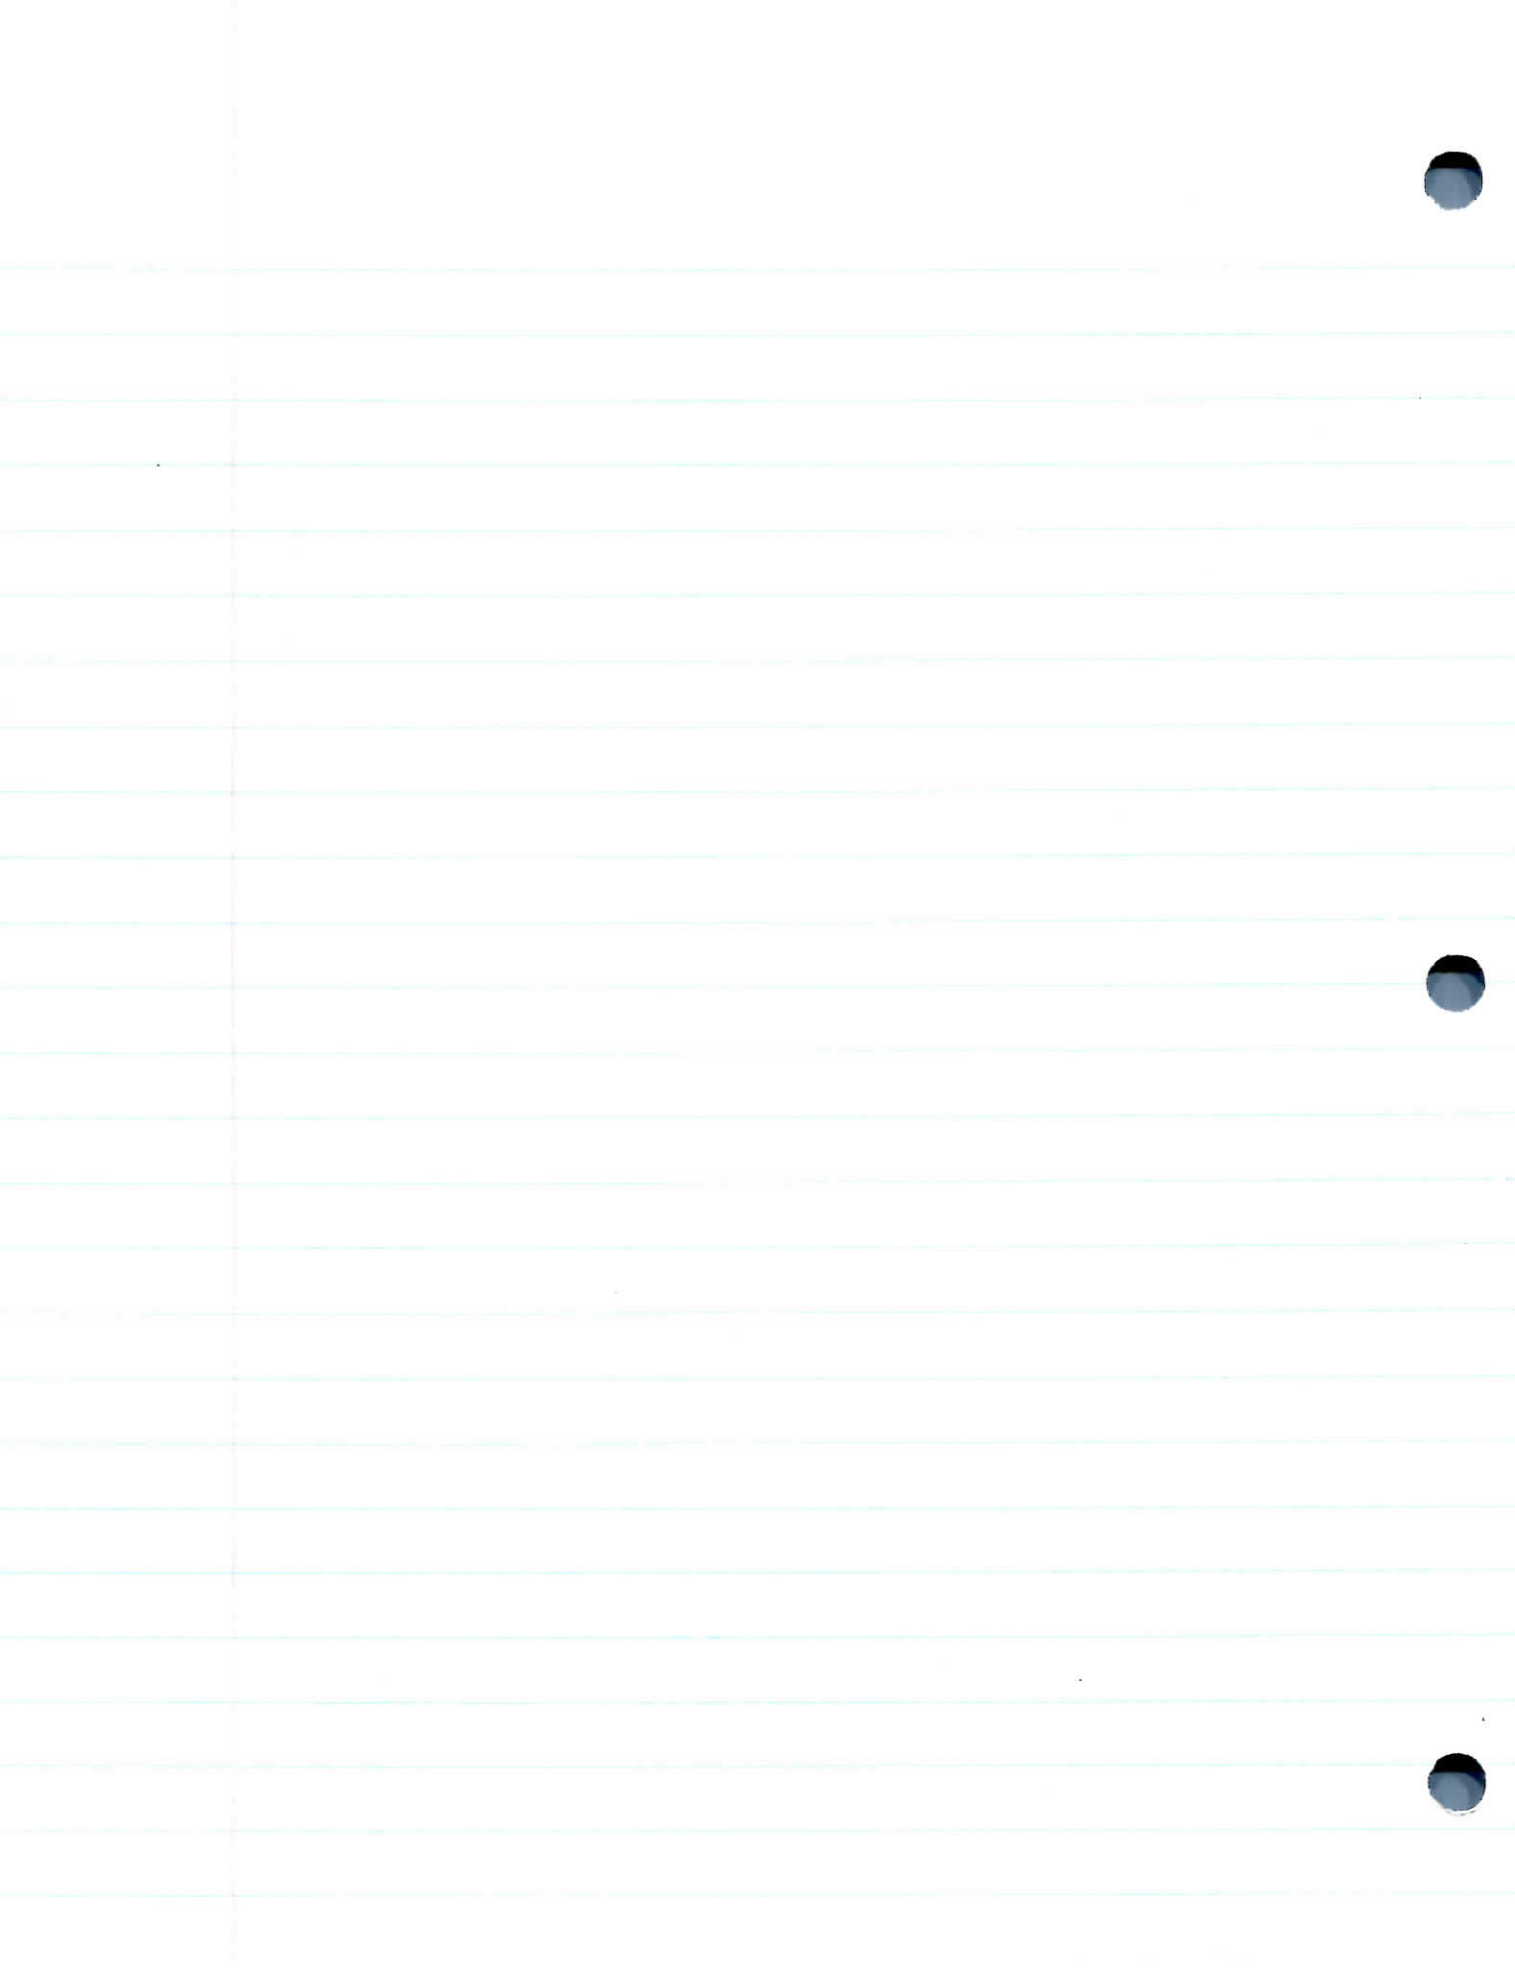

"How'd you guess?" Angelica walked in.

In space...

"What's up Gison's sleeve?" Willy asked.

"I think I know," Edmund

replied.

## Chapter 93: Death in the Family

"Everybody's out but, Angelica!!!  
!!!!!" Edmund flew to the mothership.

"Where are you goin' Edmund?!!!"  
Mimla yelled.

"He knows what he's doin'," Matt held his girlfriend back.

On the mothership ...

"Why'd you come Angy?"  
Commander asked.

"You know why, mother,"  
Angelica had a firm voice.

"He's mine, I control him,"  
Commander had a grin.

"Look out Angelica!" Edmund jumped Jordan knocking his laser away. Cathleen jumped on Edmund's back. He elbowed her and threw her into the wall knocking her unconscious. Jordan picked up the laser and aimed at Edmund. Angelica used her U-gun to stun Jordan. Commander raised her right hand and shot a beam at her daughter which drained her life force. Angelica fell to her knees.

"No, stop Commander," Edmund ran after Angelica's mother.

Commander raised her left hand. Edmund stopped dead in his tracks, "Come to Mommy."

"Yes master," Edmund's mind was controlled by Commander. Marilva owned Edmund because of their wedding ring. Commander wore the ring that Marilva used to wear. Edmund wore the other and intern had to obey Commander.

"Fight her Edmund," Angelica said weakly. Commander stopped.

Dadonia (Lieutenant) and her husband, David, picked Angelica up by her arms and carried her off.

"What do you wish of us?" Cathken asked.

"Go to the planet and wait for us there," Commander ordered.

"Anything else?" Jordan asked.

"See that we're not disturbed, and send the infiltration force down to Earth. I want no mistakes,"

Commander kept her stamina

On the S.S.C.

"I've set the timer for ten minutes," Bitson replied.

"We have to get our people outta there by nine minutes," Arison replied.

"Beavy," Willy ordered, "stay here. I'll go in."

"Me too, I've never seen one of those things before," Arison agreed to 5511

go.

"How many of us?" Willy replied.

"Before you go in, help me load up these shuttles before you go out," Gison with Willy, Beavy, and Arison put all of the dead and injured into the shuttles.

"Good luck," Beavy waved goodbye at the launching fighters.

"They sure are gonna need it," Gison said to himself.

On the mothership...

Edmund was on his knees.

Commander knelt down beside him, "We were made for each other. You must learn to face the facts Edmund."

"I've, I can't do this," Edmund was pulled up by Commander.

"You can't resist me," Commander was already using her powers of seduction. "I've planned everything out perfectly. My daughter got in the way though. I'll have her taken care of. Do you know what this?"

"Mauleva's wedding ring. What are you doing with it Commander?"

"It's the Dorodar Crystal ring. The owner of the female's ring can completely control the owner of the male's ring. I own the female's ring and you're under my complete control. I planted it where you would find it when you escaped me last time. It's the ultimate seduction."

"It sure is," Edmund hugged Commander and then kissed her.

"I wanna have your children Edmund," Commander put her arms around him.

"Maybe some other time Commander!" Willy stumped her with his laser.

Arison took off Edmund's ring and through it to the ground.

"Noo!" Commander got up and jumpkicked Arison. Edmund pulled Commander off of Arison.

"Get me go Edmund!!" Commander ordered.

"This whole place is gonna blow up if we get out or not!" Willy exclaimed.

Commander picked up the other ring when no one was looking. She got Edmund's laser and fired at Willy. Willy ducked and Arison jumped out of the way. Edmund went after Commander but Edmund found himself knocked against the wall.

"Engage!" Arison started the S.D.C. thrusters on full blast. He ran to the shuttle and took off with the other ships.

On the mothership...

"If you'll let us go, I'll do almost anything you want," Edmund was rubbing his head in pain. Arison and Willy were also in pain.

"I may take you up on that," Commander said as Edmund grabbed her hand and led her out.

The S.D.C. impacted the mothership. A huge explosion occurred. Both started flying wildly off course. The deformed mothership with the S.D.C. lodged inside of it fell down to Earth and crashed into the Atlantic ocean. A humongous ball of flames remained in space and from that ball of fire, four fighters emerged.

"Yes!!!!" Beavy hugged Gisson.  
"We did it!" Gisson was hysterical.

At the space force base...

"Thanks Commander," Edmund hugged her.

"So you do have feelings for me don't you?" Commander asked.

"Yeah, I guess I do," Edmund replied.

"So what will become of me?" Commander asked.

"I don't know. it depends on what 555

the president has to say."

"Shi-, "Commander said to herself.

"What'd you say?" Edmund was curious.

"I didn't say anything," Commander lied but nobody noticed. She called off the attack and now she had the advantage now that she was on Earth.

"I'm gonna go take a shi-, " Willy walked off.

"I'm goin' to that plant. Will you be alright?" Arison asked.

"I'll be fine," Edmund reassured Arison.

"Okay, check ya later," Arison took off in his fighter.

Commander turned to Edmund, "No one can save you now. The Dordans have taken Yurtalia over, and your friends are gone."

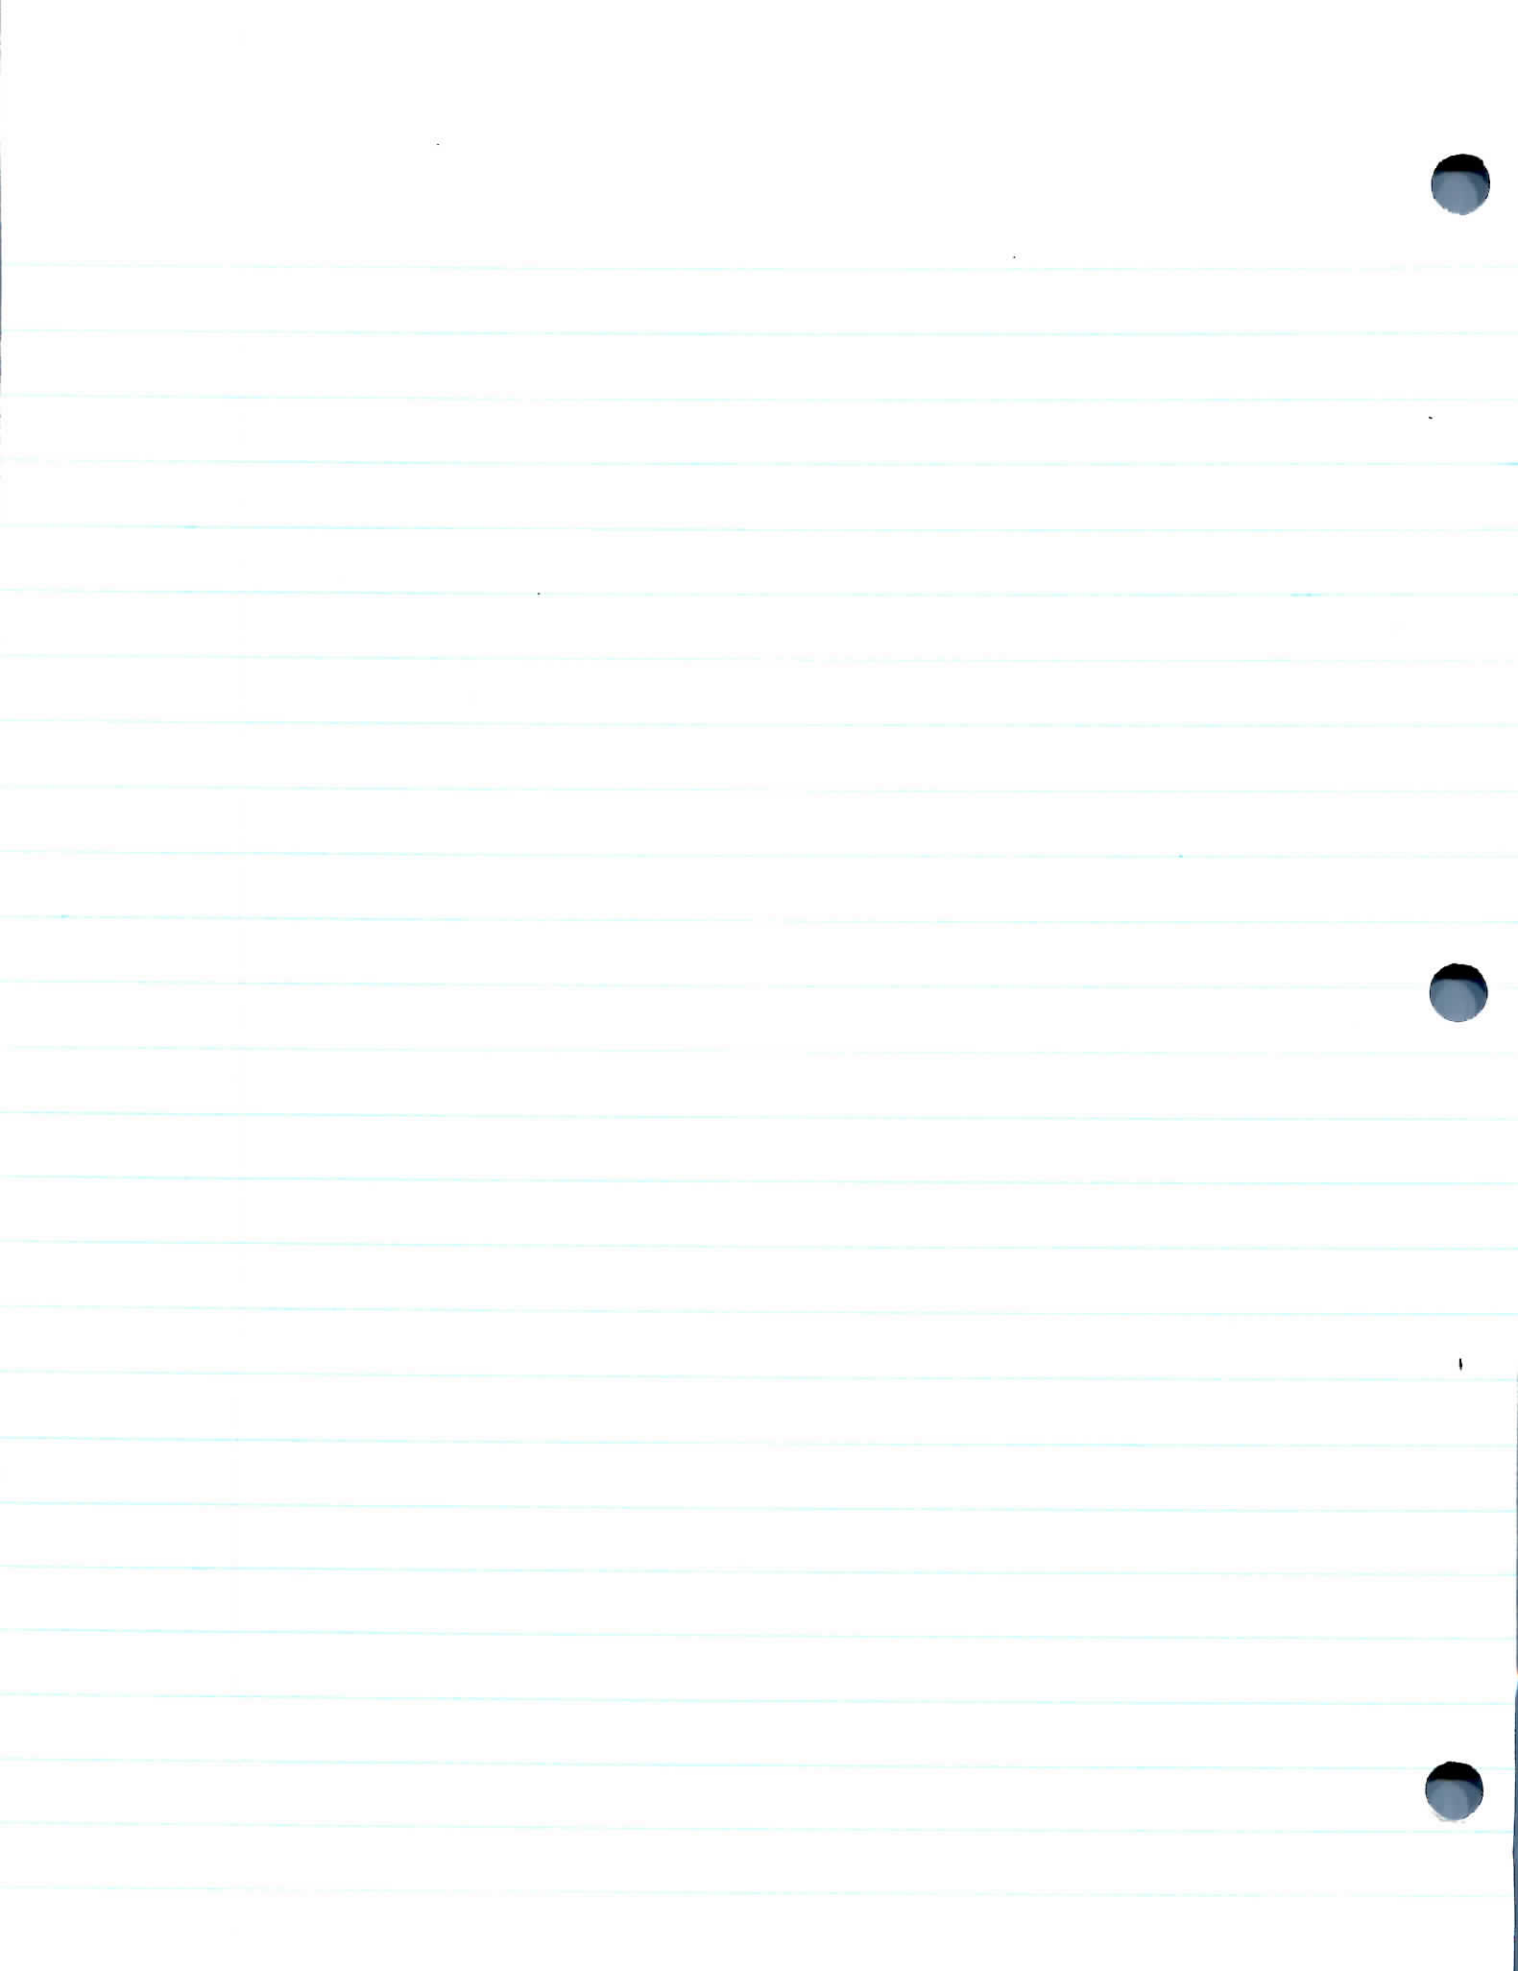

Edmund walked back until he backed into a wall, "What are you gonna do to me?"

"I haven't decided," Commander put her arm around Edmund. She then put her opposite hand on his chest. 556

pink orb surrounded her hand and then Edmund's whole body.

"You too timing bi-", Edmund fell into Commander's arms unconscious.

Willy came out of the bathroom to see Commander and Edmund. Commander saw him start to run for help, "He won't get too far." She raised her hand and Willy froze in his tracks. When the Dorian guards touched him he fell out unconscious. They carried him off.

## Chapter 94: Mind Games

Edmund awoke in a chair lying on a table, "Oh, fu-- , what happened. Ill, Oh I feel like shi-. But what does shi- feel like?" Edmund saw a long wall with R.D.G., R.D.G., Willy, Jerry Garrison, Zart Jr., Ms. Dike, Scott Gipsword, Deen, Mike <sup>Mc</sup> Deen, and Angelica strapped into chairs with a crystal ring around each of their foreheads. They all seemed to be in some sort of stasis.

"We captured these people," a Dorodar told Commander. More guards come in and strapped Gitson, Beavy, Sellers, Neff, Acro, and 558

Grease Monkey to the chairs and put the crystal rings around each of their foreheads. They went into stasis too.

"Ah, you're awake Edmund,"

Commander walks over to him wearing blue high heels and a tight fitting blue outfit that did not come to her knees. It showed off Commander's sexy figure perfectly.

"How'd you guess?" Edmund asked sarcastically, "What are you doing to them?"

"If I'm gonna conquer your planet, I'll need diplomats. All of their information will be bleached from their minds. Then they'll be reprogrammed. I'm having all of your soldiers with the space force being crystallized. All in all, they will all be my willing slaves."

"What about me?" Edmund asked.

"I really haven't decided yet."

Commander had basically won.

"Where's Jordan, Cathlean and the rest?" Edmund asked.

"Back home," Commander sensed fear in Edmund, "just calm down. Everything'll be fine under Dodan rule. You'll see. Now it's time for the mind phaser. Take Angelica and put her in a tube. I do not want her reprogrammed."

"What about him?" a guard pointed to Edmund.

"I'll take care of him, now leave me," Commander ordered as the guard took Angelica away. Commander activated the machine.

"You won't win Commander," Edmund hoped.

"Bull shi-! Your friends on the alien planet have been sent into a trap. These people here are being brainwashed. You're not goin' anywhere." She did not know the power was off.

"I knew this shi- wasn't hap'nin'," Arson ran to the doors where Angelica was about to be carried out. He put his clip in his eye and cocked it. The gate opened and Arson

unloaded.

He ran to Angelica, "You alright?"

"Yeah, I suppose," Angelica was just awakening.

"Do you know where Edmund is?" Arison asked.

"No I've been out cold the whole time," Angelica was honest.

"Just let out your feelings about me," Commander suggested.

"I have too much respect to use these kind of words," Edmund replied.

Commander held Edmund's left wrist. Edmund heard a click, "What's this?!"

"Just a crystal bracelet," Commander smiled as she put on a gold bracelet that was identical. She also put on her golden ring and gave Edmund an identical crystal ring.

Edmund hugged Commander and then kissed her, "What about D.J.?" "Son

"Fu -- him," Commander helped Edmund up.

"What is this jewelry?" Edmund asked.

"Oh nothing," Commander explained, "you've gotta listen to me."

"But -," Edmund could not disobey. He then knew what the bracelet and ring did. He was now under Commander's complete power.

"Now listen," Commander continued, "Paver, is not a defector. He tricked all of your asses. The fu -- er has the plans to the S.D.C. and plans to do something drastic. I'm personally against All the Dorodans have done. I have to go along with it or he would have killed me. I'm sorry about Erica, and Marilwa."

"I knew somethin' was up when you freed your daughters. But what about this love affair?"

"This is real. If you follow through with it, I may spare your planet. Theoretically, I have no control (S6a)

over what Haven does. I do have control over what you do though. I'm not afraid of Haven, nor you. I'm not doin' this for the planet. I could give two fu--s about the people. I'm not even doin' it for you. I'm just doin' it to defy Haven."

"Shi-, I've heard that before. I just can't place it now," Edmund had heard that previously by Angelica. "Why are you so against Haven?"

"Haven - forced me to become a Dorodan."

"What are you sayin'?" Edmund was concerned.

"We used to be scientists together. We did a lot of shi- together. We designed the original Space Station Colt. <sup>with John Smith</sup> About around the time your father was a child."

"Wouldn't you be as old as Haven?" Edmund deduced.

"I'm getting to that," Commander

continued, "We hooked up with this guy, Claw, a terrorist. Cesar probably told you about him so I don't need to update you. We designed those freezer tubes. Haven was fu--in' crazy, helpin' out that psycho, Claw. I tried to turn him in but Haven got to me first. Besides, the police were all corrupt anyway. Haven was working on the chemistry of crystals. Crystals don't age. We knew that. Haven started doing all sorts of experiments on me. I couldn't stop him, he'd always drug me and violate me. He prepped me for surgery by injecting a knockout solution with many tiny particles of crystals into my blood stream. Haven took the freezer tube a step further, he made it so he would fuse crystal cells with regular human cells. I was always but mutha fu--in' naked in front 5a11

of that as-hole. He saw me crystallize and then turn back into my regular form."

"You're the mother of all Dorodms?"

"Yeah, I guess so," Commander agreed, "This was all before Haven added the loyalty to the Dorodan cause command. He stored me in a freezer tube and then crystallized himself. Her was much older than me. Since Claw was a partner and terrorist, the captured people were crystallized. Claw left John Smith, my step father with us. Those captured people bred children more rapidly and then we had the Dorodan race. The Dorodans mastered their many powers. Claw was getting scared. Haven did not do this. If he did, Claw would be in deep shi-. Claw got his ass kicked and had accidentally put Haven in a tube. The first S.D.C. crashed but no remains were found. We left 5651

for the crystal planet by fixing up part of the S.D.C. Claw put himself in a tube next to mine so he would meet age. Haven started over. He forced me to have Angelica and Lieutenant. Claw had already raped Mrs. Smith, my mother-in-law. Glove was much like his father. He forced me to have Billy. I sent him to Earth to Grease Monkey's lost son. Acro took care of Billy. I didn't know these people at the time. We took the crystal age a step further and built the regeneration cells, or as humans call it, the cloning device. He been planning for vengeance ever since. "Commander was already crying, "I've never told anybody this before. If you tell anyone, I'll kick your ass."

Edmund held Commander, "It's alright, well it's not alright, but you know what I mean. In this vengeance, you could get seriously 566

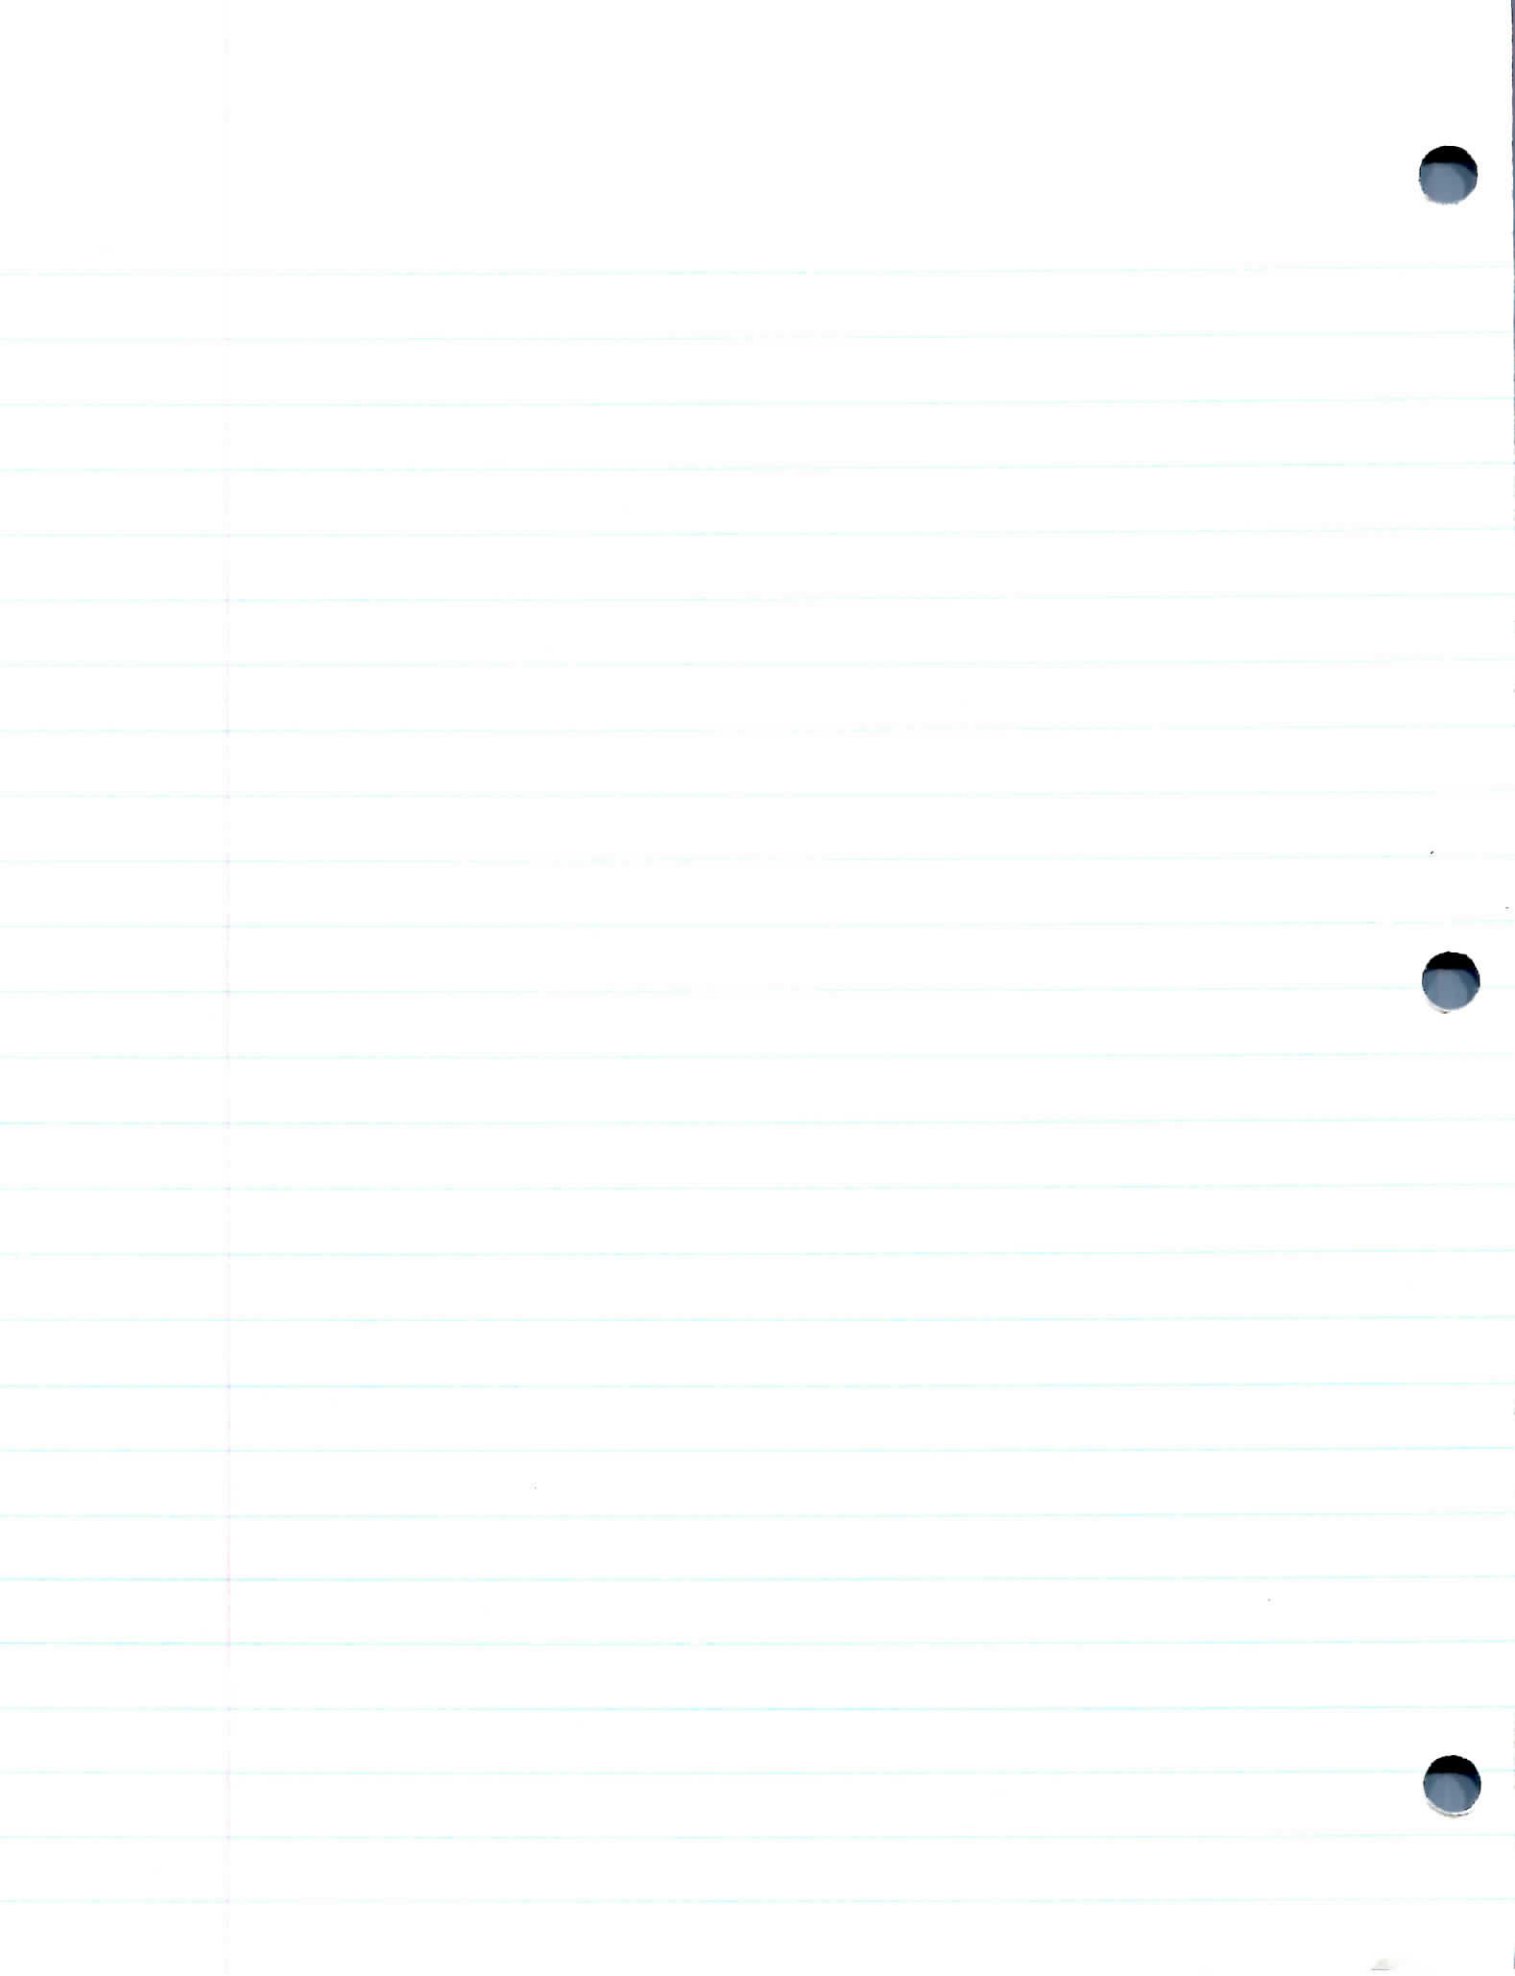

fu--ed up. Like my dad always  
says, what's done is done and  
you can't change it. Now free the  
space word."

"I can't. It's irreversible as of  
this time in period. Besides -."  
She was cut off.

"Besides, I'd find out," Haven  
walked in with D.J., David,  
Jordan', and Cathleen.

## Chapter 95: Double Planet Liberation

Edmund stood up to Haven, "Just step the fu-- back, she's been through a lot."

Haven picked up Edmund by the face, "I could kill you with the flip of my hand."

"But you won't father," Angelica shot Haven with her U-gun. Everybody took cover when Arison came in with a loaded uzi.

"Ha, that was easy," Arison put his gun down to his side. Jordan jumped him. Lieutenant went after Angelica

"Get off you piece of shi-!"  
Arison flipped Jordan into a wall and then unloaded.

"I hate you Edmund!" Cathleen pulled out a laser and fired. Edmund blocked them with his laser watch.

Haven ordered, "Get them," to the space zone. Edmund blocked a laser into the apparatus. They woke up and were their regular selves. Grease Monkey grabbed Haven and got knocked across the room.

"That fu--er packs a wolley!" Grease Monkey ordered, "Beavy, Willy, Arison, we need air support." "You got it!" Willy picked up Beavy and ran to the fighter.

"I gotta check on our other guys," Arison replied, "I have a feelin' they may need us."

"K.A.G., K.A.G., Mike Mason, get Scott and Deen to safety," Grease Monkey was interrupted.

"What about me?" Deem asked.

"Whatsup Deem?" Susan asked.

Sellers and Neff ran to the

fighters and helped out Willy and Beavvy.

"A baby, wassup?" Gart was asking out Lieutenant, "How's about you and me, in my bed tonight after this all blows over?"

"Get me go you fu-- in' pervert!" Lieutenant did not like Gart so well.

Ms. Dike ran over to Edmund while he was still fighting Cathleen, "What the he-- is goin' on?" Jerry pulled her down, "Get me go, my love is for Cestron only!"

Edmund turned to Commander. She smiled and then pushed Edmund out of the way barely missing a shot by Cathleen.

"Shi-, outta fluid," Cathleen kept pressing the trigger. Gitson saw the opportunity and blew Cathleen away.

"Retreat!!!" Raven ordered. Claw snuck up behind Angelica and put a smelly cloth on her nose and mouth. She fell out unconscious.

"Uh, out me, Angelica!" Commander ran after her. Gerry and Edmund followed them.

Haven, Claw, Lieutenant, and Angelica boarded a shuttle and took off.

Gerry spoke into his communicator, "Willy, come in. We have a kidnapping."

"I really can't help you now," Willy replied.

"What do you mean?" Commander took the communicator.

"Can't talk now, Willy out!" Willy's voice was troubled.

On the shuttle...

"Where do you want her?" Claw asked.

"Is she fu--in' pregnant?" Lieutenant asked.

"She is, put her and her fetus in a freezer tube," Haven grinned and rubbed his chin, "I have to think this out."

"Son," Jason walked over to Gerry, & 577

need you Acro, Ms. Dike, and Galt to stay here. You guys have to defend the Earth. It may look hard, but it's easy."

"What about me?" D. J. was completely out of Commander's power. Ricardo stepped up

"me too," Ricardo held out a package, "I know what they're doing."

"We found this in Plaven's office," Matt replied.

"You won't believe this," Mimla agreed to the astonishment.

On the Alien Planet...

"Dad!" Mike sped over to Sped Strong.

"What's up Mike?" Sped Strong hugged his son.

"What's the plan Cestron?" Galt asked.

"I don't know, why'd you ask me?" Cestron replied.

"You're the fu - - in' leader!" Galt <sup>572</sup>

exclaimed.

"Oh, okay," Cestron agreed.

"Welcome back Cestron," Standon walked out.

"A wassup Standon!" Arison landed his fighter on Standon crushing it completely.

"Nice fu--in' entrance," Sped Strong replied.

"Look out!" Mike yelled.

Everyone took evasive action.

Gart pulled out a bayonka and filled it with Gart bombs, "Check out this technology sons of bitch es!" Gart fired and the putrid fumes gassed the Dorian guards to death.

"They usually knock people unconscious," Cestron replied.

"Do you know how long we were in the journey bin?" Arison asked.

"It shi- is contained and waiting for a few years it starts to smell bad," Gart updated 573

everybody about the subject.

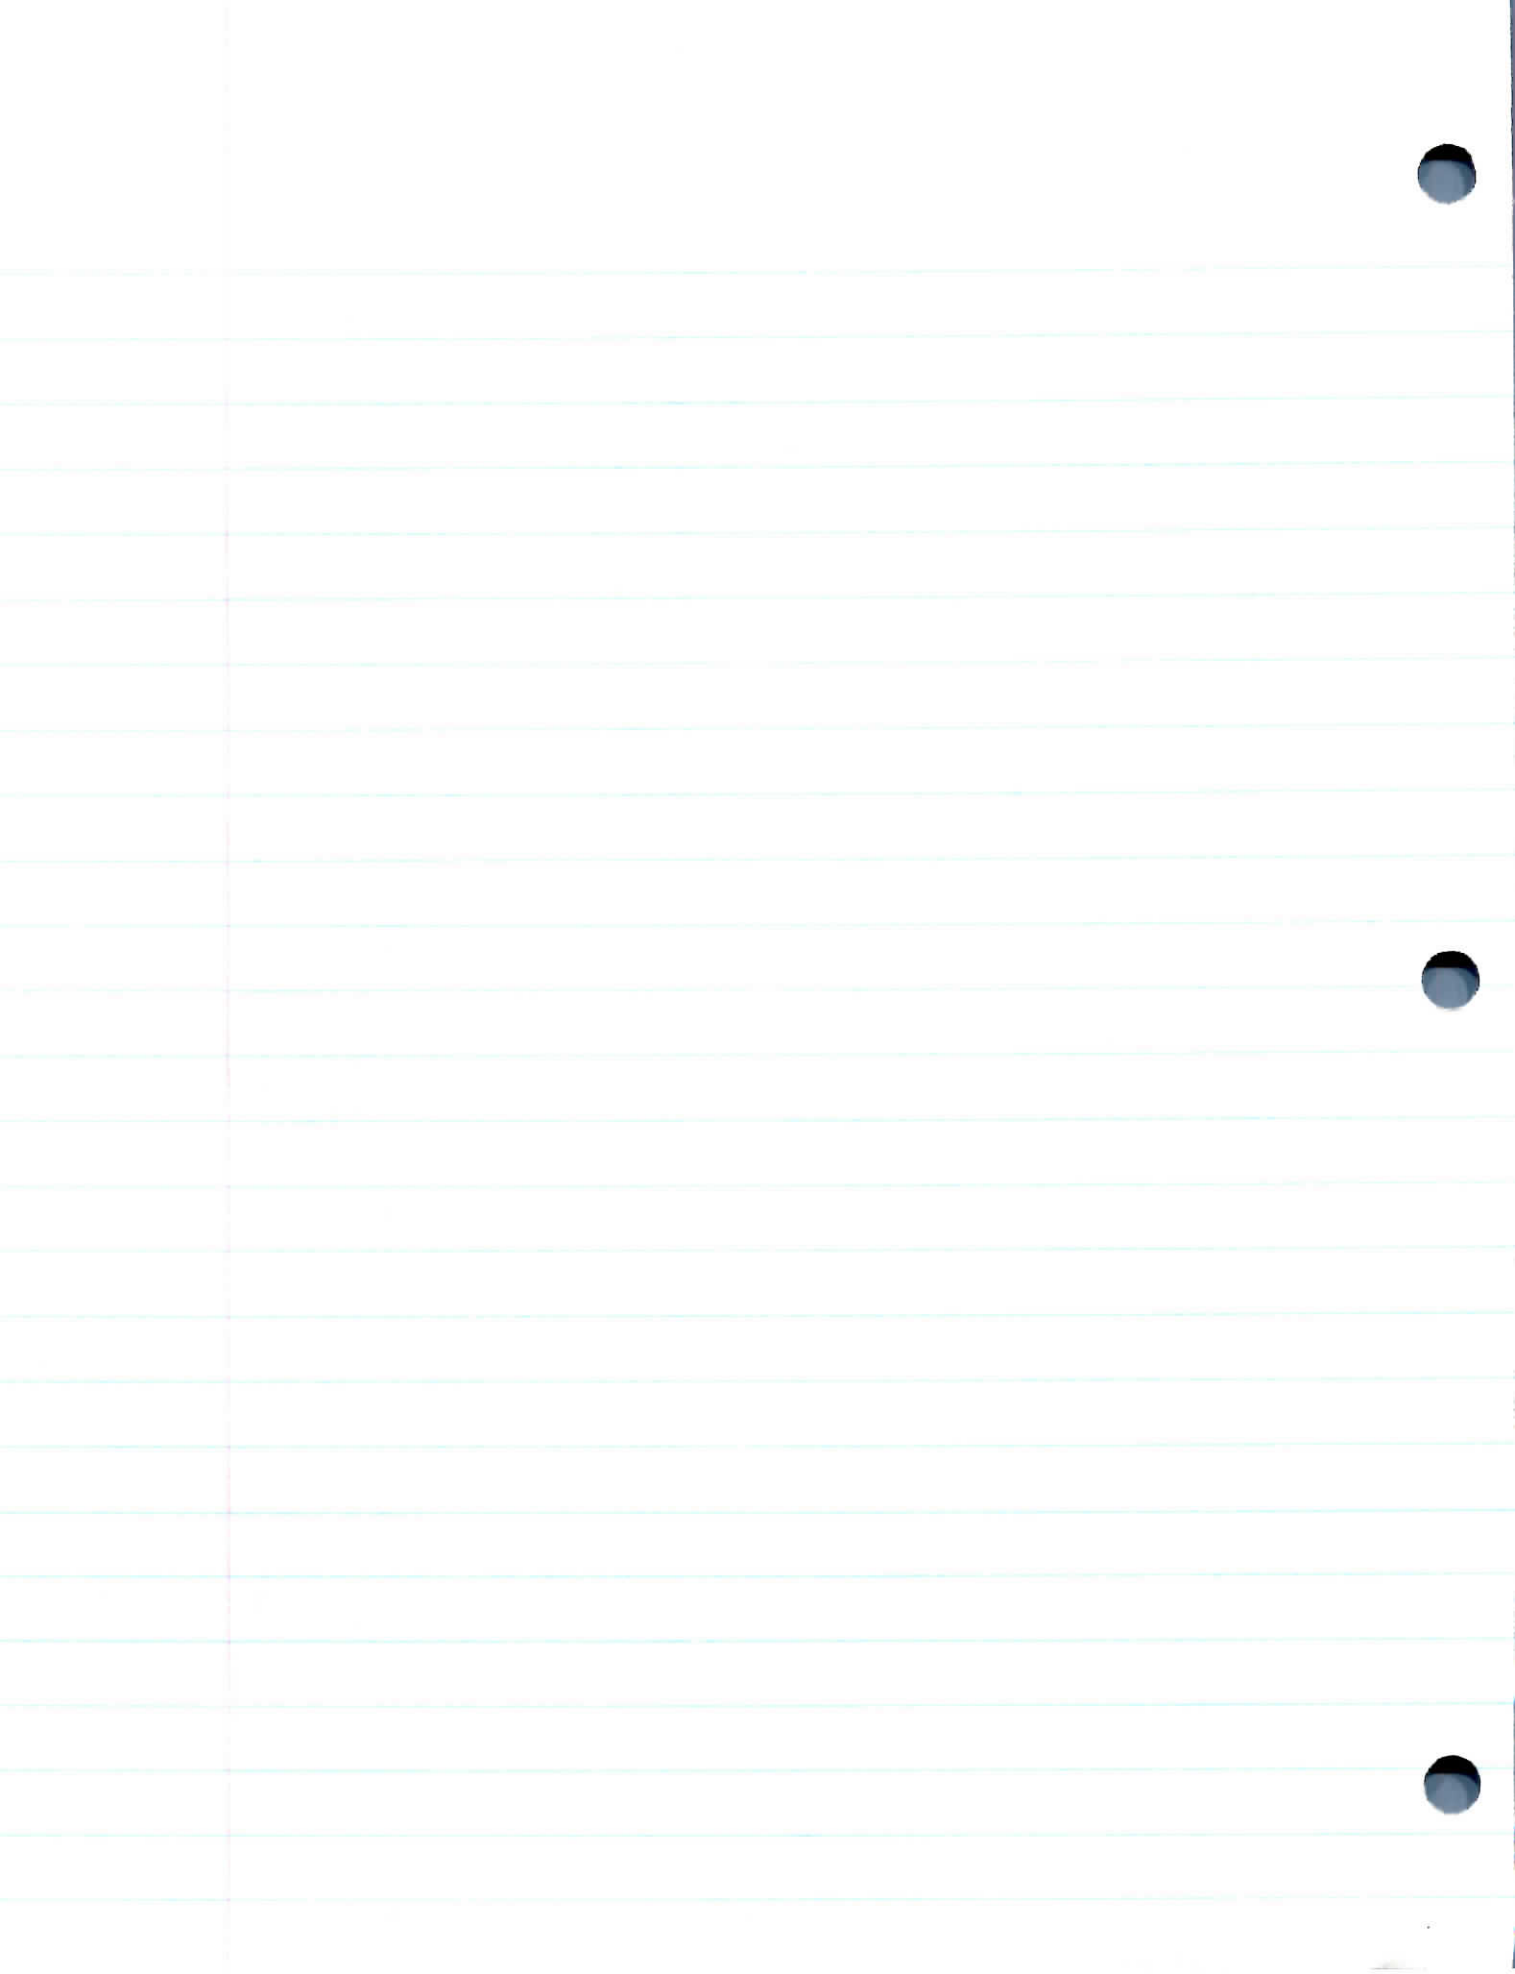

"Thanks mister Gort," Mike said sarcastically. Arison gave Mike an Uzi and they all reloaded and cocked their weapons. They ventured on.

"Look!! Out!!" Billy exclaimed.

Since Cestron and Arison were bringing up the rear they turned a full 180°. Cairce aimed and fired. He missed by a mile. Arison and Cestron unloaded. Each bullet hit and punctured Cairce. He fell out in a bloody, mutilated pool of nothing. Cairce was a blob of blood and goo. Smoke emerged from the fried body. This time Sped Strong didn't save him\*.

"I guess that's what you get when you take a cheap shot," Mike replied.

"What happened to Billy?" Gort asked.

## Chapter 96: Billy's Battle

John Smith, Johnny Smith, and Charlene Smith had dropped their rescued people off but diverted their course to the alien planet following Claw as soon as Claw left Raven's shuttle.

"Time to die Billy," Glove jabbed his claw at Billy. The third time he did it Billy grabbed the claw and hit it. There was a large clang.

"You did this to me!" Glove pulled off the claw. It was a fake hand.

"Sorry father," Billy pulled out his 5751

9mm and shot Glove in the chest, "Who, is, my mother?"

"I won't tell you," Glove said as Billy jumpkicked him in the face.

"Who is she?" Billy held the gun to Glove's head, "I'll blow your fu--in' brains out, now tell me!"

"Go ahead," Glove dared his son.

"You mean it?" Billy asked.

"I won't give you the information you require," Glove grinned.

"Don't do it Billy!" Fart ran in, "Use this." Fart handed Billy a shot gun. Billy used the pump and aimed it.

Claw flew down and jumped Billy. Billy kicked him off and went for the gun. Claw sliced at Billy while Billy blocked it with his pump shot gun.

"Kill him!" Sofan urged Claw on.

"Keep your da-m keyboard shut!" Astron disconnected Sofan. The guys 5761

unloaded and blew up Sofon.  
John Smith jumped down off the  
mountain and picked up Billy's 9mm.

Glove grabbed Charlene, "Stop or  
she gets it!"

"Wanna bet!" Johnny jumped  
on Glove. They fell off of the  
mountain with Johnny on top.

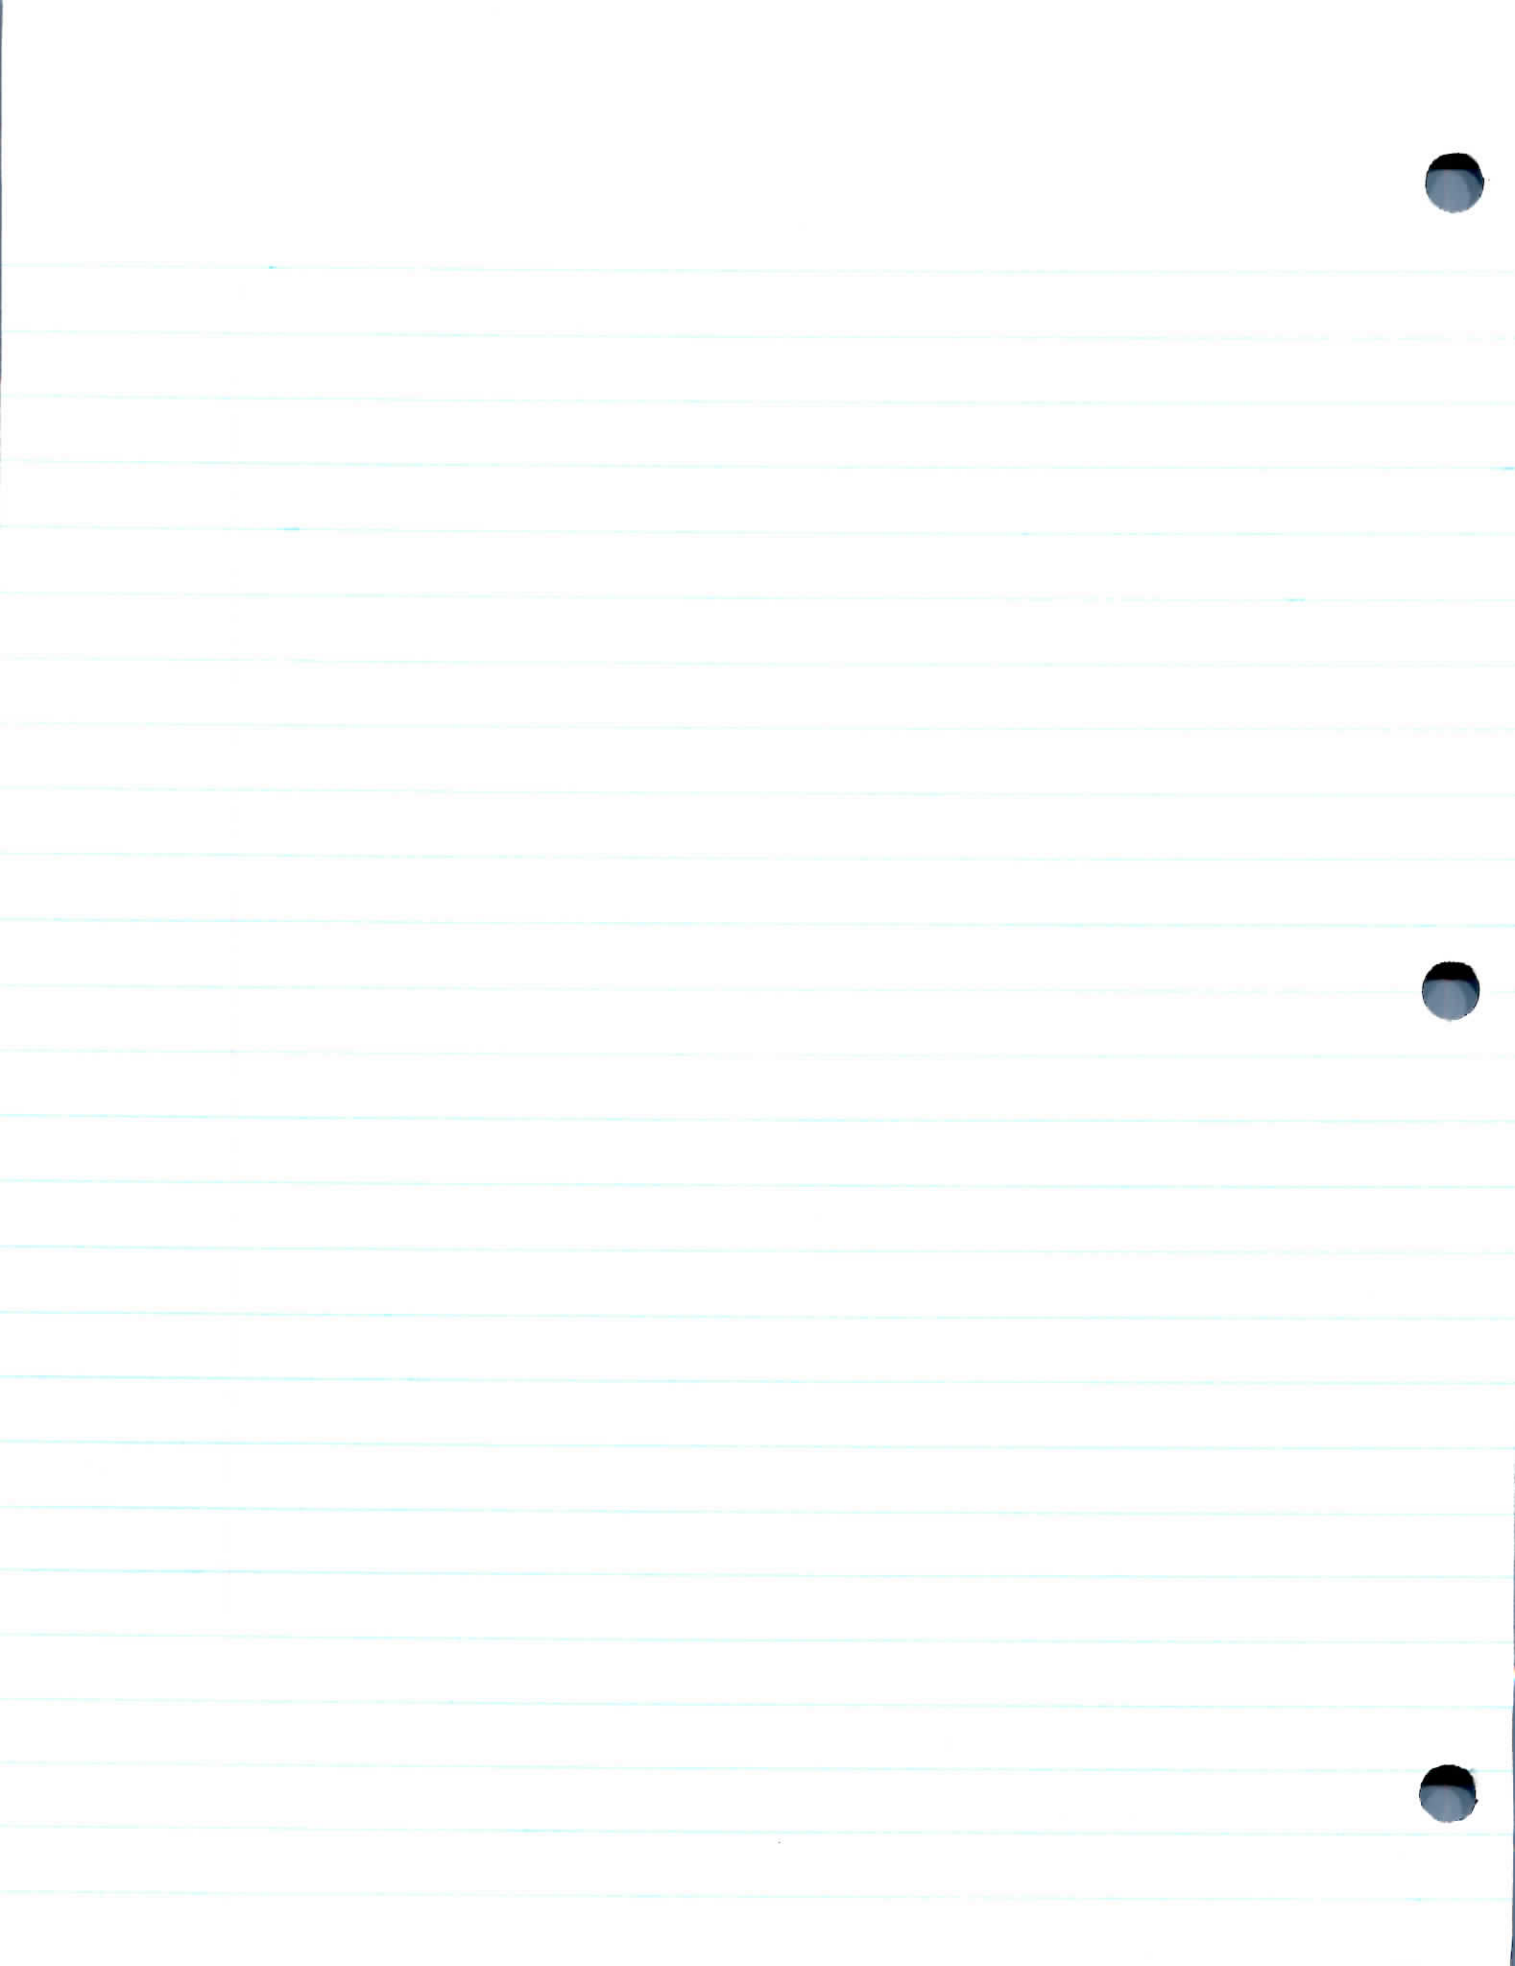

Billy jabbed Claw in the  
stomach and pulled out a  
Chinese star. He threw it so it  
landed with blade side up, lodged  
in the ground. Glove's head landed  
on the star. The star went right  
through like a hot knife through  
butter. Glove would not have had  
a chance anyway. When Johnny  
landed on him, he crushed Glove's  
lungs, and everything important.

"You can never catch the Claw!  
Never!" Claw ran off. John  
Smith shot Claw in the legs

"I said this about Edmund,  
and Maulava, Mike replied 'thank  
God these crazy people are on 577)

our side!"

## Chapter 97: Take the Defensive

"I tested Angelica," Lieutenant walked in.

"So what'd you find?" Raven asked.

"She's not pregnant. I'm sorry I got your hopes up father."

"So am I," Raven pulled his laser and shot Lieutenant killing her instantly.

"Why'd you do that?" David asked.

"Get the fu-- outta here. Just leave me alone," Raven thought to himself.

On earth...

"What's wrong Commander?" Grease Monkey asked.

"My daughter, Sadonjia, is d-dead."  
"That's fu--ed up," Edmund said.

At the White House...

"We came as soon as we heard,"  
Sheriff Pook shook Acro's hand.

"You guys need guns?" Scott  
asked.

"They would help," Ricardo  
replied.

Deen opened a door with tons  
of munitions, "I always save 'em  
up for rainy days."

"We'll never reach a rainy day  
if we can't hold them off," Mimla  
said.

"Get your as--es down!" Matt  
ordered.

An armada of Dorodan soldiers  
charged the White House, Rumbling  
and gunshot occurred soon after  
the Dorodans came into sight.

"What the fu-- is that?" T.A.Y.  
asked. Pook had a smile on his face.

The Ke--'s Angels came as the 580

cavalry. They all unloaded their automatic weapons, Dave Stanley jumped off his bike and shot the gas tank. The bike crashed into a chunk of the Dordan army. The explosion took out another chunk.

Acro used his ninja skills. He kicked, punched, elbowed, flipped, and used his weapons. Though he did not hit or teach anyone, it gave East the initiative to blow the distracted Dordans away.

R.I.G. 4 and R.A.G. 7 used the heavy artillery. They were using rocket launchers. One Dordan ran in front of R.I.G. 4. A rocket went straight through the Dordan's head and then carried him off killing more Dordans.

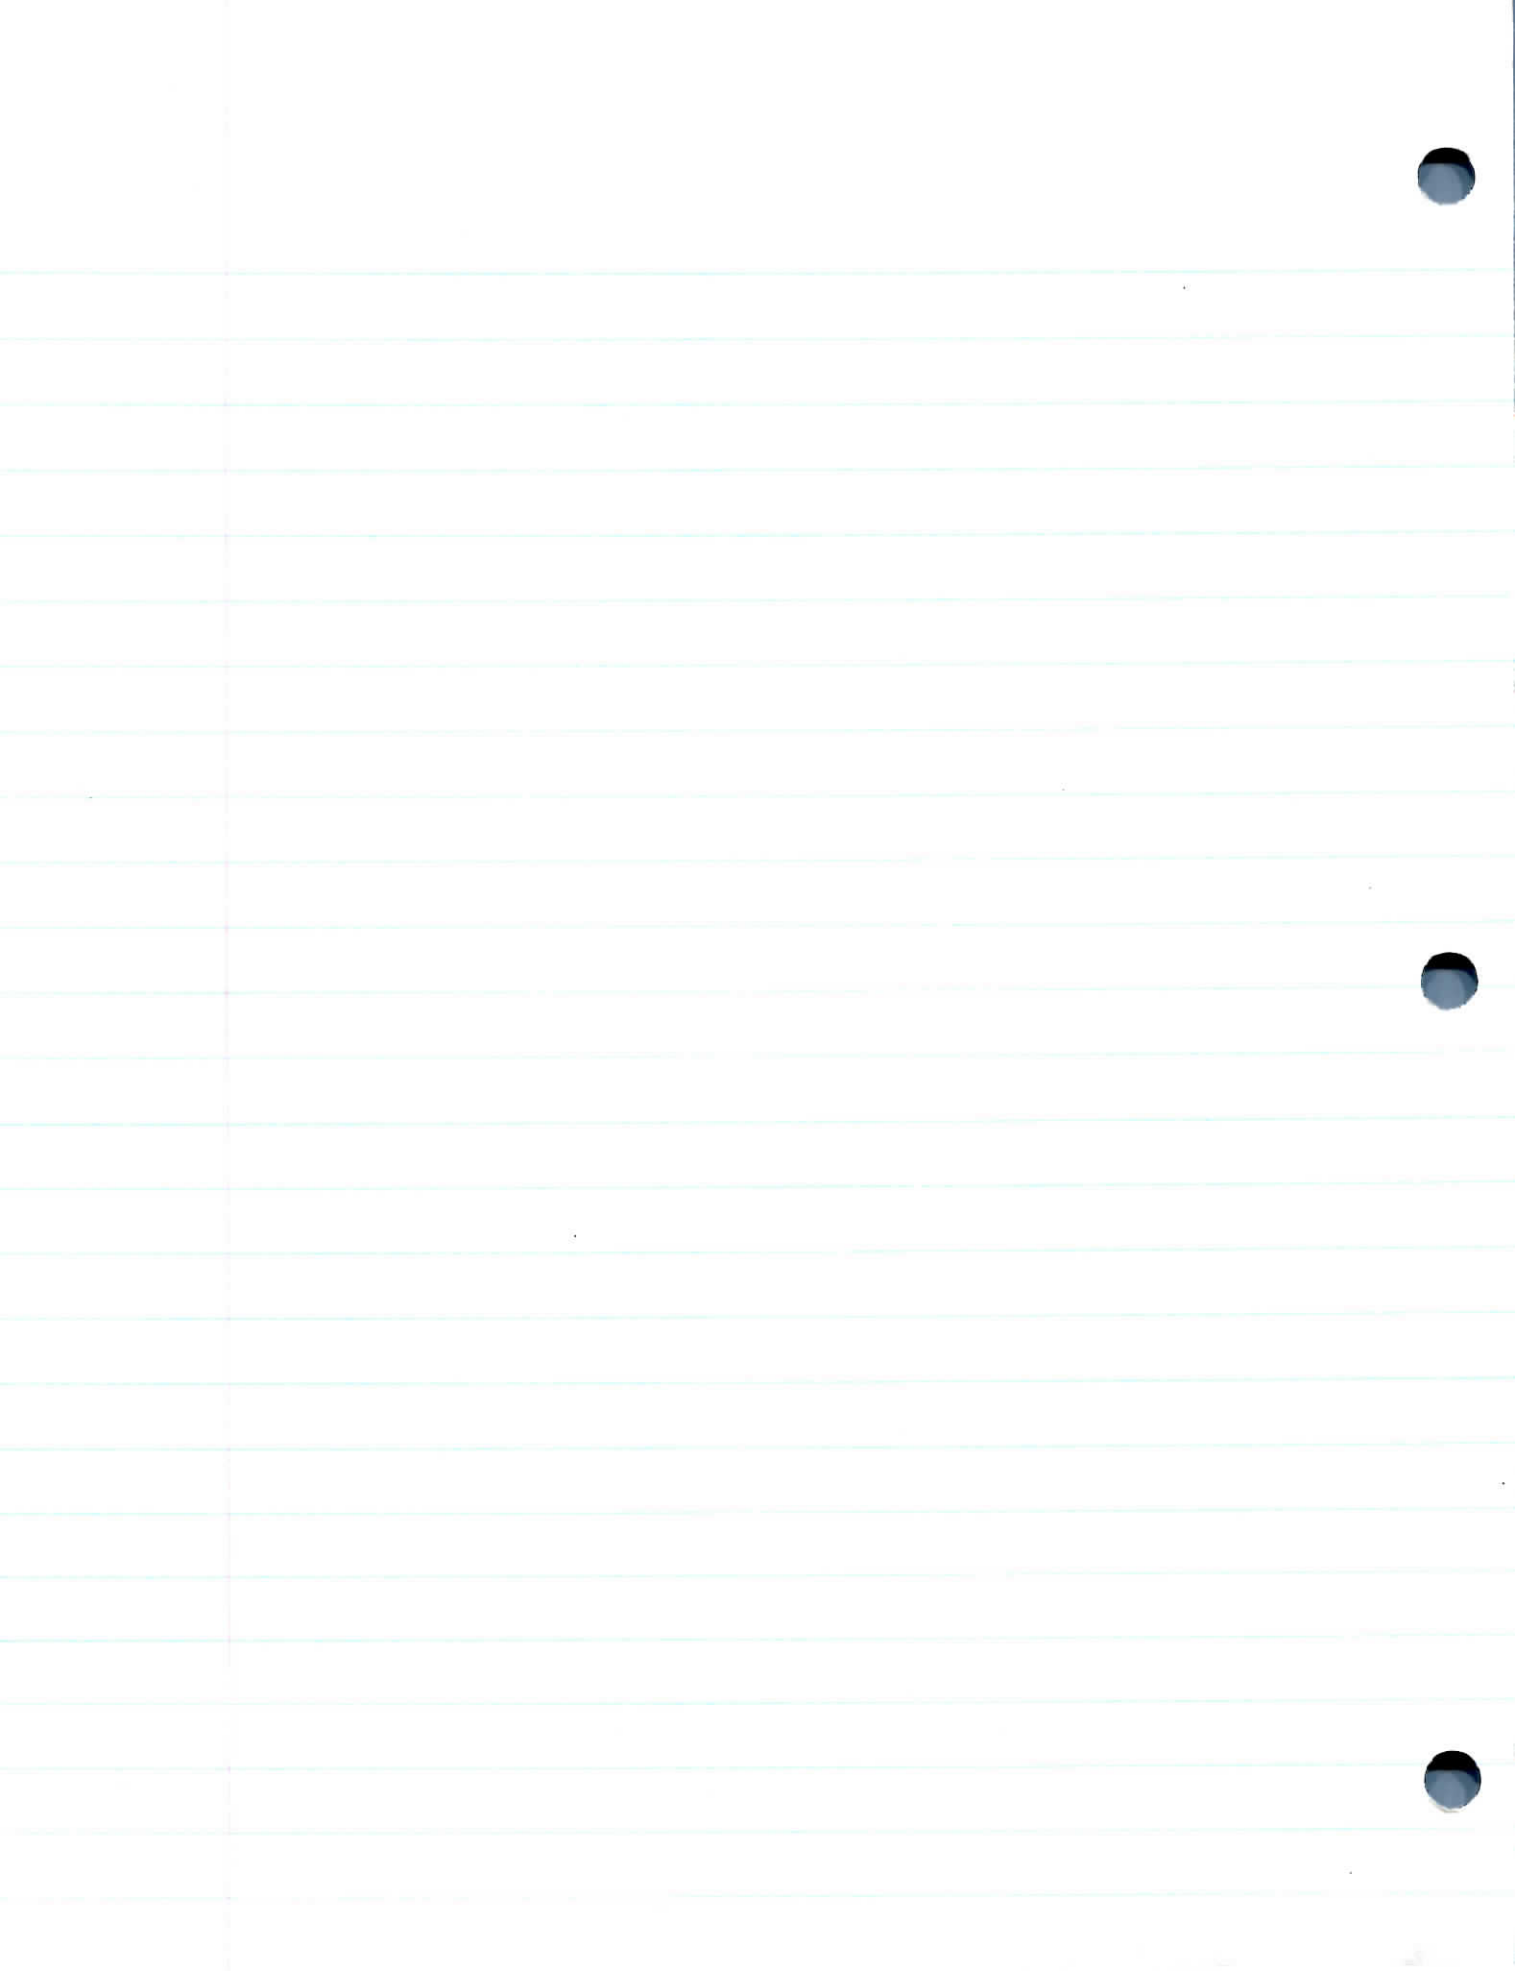

"I'm tired of this shi-!" Matt and Mimla fired at the whole

rest of Dorodans taking them out. Ricardo threw bombs and grenades making the enemy fly through the air.

The second wave of Dorodans came. This time Willy, Beovy, Neff, and Sellers flew down and took all of them out in a single stride.

Pussy Bear even got into the action. She and P.J. threw rocks. Pook tied people up and took their weapons making them sitting ducks.

Ch...

## Chapter 98: The Crystal I.D.C.

"You won't believe what I saw up there," Willy was hysterical.

"A space station?" Grease Monkey asked.

"That shi - is no space station!" Neff yelled.

"You two timin' bitc -!" D.I. yelled at Commander, "Are you sure want this to be over?"

"What's goin' on over here?" Sellers asked.

"Oh nothing," Commander replied, "just family problems."

"Well keep it down," Neff ordered.

Cestron, John, Johnny, Charlene,  
Mike, Billy, Gert, Sped Strong, and Arison landed.

"You won't believe what we just  
saw!" Charlene was hysterical.

"This is the second time today  
that dejavue has occurred," Edmund  
replied.

"Why is she here?" Billy asked.

Edmund whispered to Commander, "  
Tell him now. You owe it to him.  
Tell all of the Smith's what you  
told me. Their your family."

"You better be right about  
this Edmund," Commander threatened.

"Could I speak with John, Johnny,  
and Billy please?" Commander asked.

"What about me?" Charlene asked.

"Sure Charlene," Commander agreed.

"Where are the rest?" Mike  
asked.

"Who gives a fu--?" Gert  
replied.

"Yeah we can take it," Sped  
Strong agreed.

"It's not that easy," Beavy stepped <sup>580</sup>

in.

"Yeah, we fired at that thing and our laser bounced off, almost hitting us," Willy explained.

Gerry drove up and came up to Givson, "What's up Dad?"

"Gerry," Givson asked, "where was the S.S.C. most venerable when you built it and raised it from the Atlantic?"

"I know what you're thinkin'," Neff replied.

"You're a fu--in' genius," Sellers praised Givson.

Gerry answered, "It's venerable in the thrusters, the locking bay and at the precise point of intersection between the compartments. A shot right in the middle of the intersection, on all sides would completely disconnect it. The locking bay is easy. The thrusters would diffuse the lasers if you shot straight in there."

"We've taken out all of the Dorodians," Deen radioed back.

"That should give us an edge," Deen suggested, "no defense."

"That's true but I don't know how to take out the thrusters," Gerry admitted.

"If we took out the thrusters," Sped Strong reasoned, "the ships can't maneuver. They won't be able to shoot us down."

"We should send in our best," Neft suggested.

"That's me!" Willy and Arson said at the same time.

"I can do the thruster," Commander walked up, "Haven and I have worked on how to destroy the D.D.C."

"We need at least one more," D.J. said, "ok and Commander, if you're not totally legit, I'll personally kick your as-."

Commander thought of her past experiences with Haven and lurched 586

for D.J. Edmund held her back.

"You act just like Gart you know?" Charlene asked.

"Yeah, you always say the wrong thing at the wrong time," Mike was talking about the younger Gart. Both Garts have the same attitude and personality though.

"Yeah you dumb mutha fu--a. Always sayin' the wrong shi- at the wrong fu--in' time, da-m," Gart announced.

"Shut the fu--up!!!" Everyone but Gart exclaimed.

"Can I please go Willy?" Beavy asked his hero.

"I don't know," Willy asked, "do you have what it takes?"

"How could I tell if you don't let me prove myself?" Beavy replied.

"He has good reasoning," Deem said.

"I say he should go," Cebron agreed.

"Hey look on the y.o.!" Mike called

everyone over.

On the screen...

"This is Haven, I have a space station up here. It is an exact duplicate of Space Station Colt. It has enough force to take out a whole chunk of your country. I will destroy your families if you do not submit your leaders to me and that defector bit -." Commander started getting mad.

"Turn over your space force or I will DESTROY you. This is for real. This is not War of the Worlds. To prove it I'll destroy San Francisco first.

At the White House...

"They can't do that shi-!"  
Dave Harley exclaimed.

"Why did he pick our home?"  
Pussy asked.

"I chose San Francisco because 887

of the Corporation and Sam Osprey."

At the new Corporation 9.2....

"That fu--ers gonna bill us all," a soldier was getting scared.

"Get Deen on the line," Osprey ordered.

"What do you want Osprey?" Deen asked.

"Did you see the past television program?" Osprey replied.

"Of course, I'm the president," Deen bragged.

"I could make it worth your while to have my troops help you out," Osprey was attempting a bribe.

"Go who is this?" Scott grabbed the phone.

"This is Osprey."

"Su-- off and die, while you suck my nice big dick up to the right three times," Scott threatened.

"Oh and Osprey," Pook got on the

phone, "you're also guilty of an attempted bribe."

"Aye Dad, I traced the call," P.J. announce.

"Shi-! Move the base," Osprey hung up the phone.

at the Space Force Base...

"You guys and one gal can take off now," Grease Monkey replied.

"Aye where's Commander?" Cestron asked.

"I'll take her place," Edmund agreed.

"That fu--in' bitc - was shi--in' all of us. She's just like Raven."

"D.J., shut the he-- up!" Billy ordered. D.J. was talking about Billy's mother.

The four boarded their fighters and took off.

"We still don't know how to do the thrusters," Willy announced.

The S.D.C. opened fire on the

fighters.

"Split up!" Arison ordered.

"We can't get a clear shot so, take evasive action 'till we can," Beavy made an important statement.

"He's good," Edmund admitted.

On the space station...

Commander dematerialized from her pink gaseous form to her human form wearing hi-tops, a pink shirt, black leather jacket, tight designer jeans, and her long star earrings, "This is how you take out the thrusters." She pulled her laser.

"Oh no you don't," David Majewski grabbed her from the back, "Haven, I've captured ahh."

Commander flipped him into the thruster's inner workings where he fried, "That's what you get when you take a cheap shot. It's your turn, Haven." Commander set the 5911

thrusters on auto explode for twenty minutes. The fighters would have to hold out till then. She then went to find Angelica.

"Da-n, she's here," Haven loaded his uzi but took his eyes off of the space screen.

"What is Commander up to?" Edmund said while landing his fighter in the docking bay. Haven turned on the thrusters and made the space station go through the quasar. The fighters couldn't keep up.

"It's up to Edmund now unless we can catch it," Cestron came in the fighter Edmund sent back.

Commander found the freezer tube, "Poor Argy. I'll get you outta there." Haven was nearby. He was out Commander's 20/20 range of sight though. He aimed an uzi at Commander. Edmund saw this and fired knocking the gun 592

out of Haven's hand.

"Shi!" Commander put her hand on the tube and a pink orb surrounded both, "Won't have enough time to get your body out, but I can get your mind out."

Haven raised his hand and fired an energy beam at Commander. She ducked and Edmund tackled Haven.

"Nooo! He'll kill you," Commander ran after him.

Edmund started strangling Haven. Haven dematerialized into a toxic purple gas. Edmund grabbed his throat and started gasping for air.

"Ha ha, fu--in' Shi-head!" Haven replied.

Commander took a small test tube and filled it with a pink gas. The gas was Angelica's personality and Angelica and Marikva's brain. Commander put the test tube in her pocket. She then ran and pulled the unconscious Edmund out (593)

of the gas, throwing him across the room.

Haven materialized, "I'm surprised at you Commander. You're getting rather soft."

"I'm not getting soft," Commander picked Haven into the wall. Haven disappeared and reappeared in back of Commander. He touched Commander. Haven's purple orb surrounded her. She looked up in pain and then Haven walked her to the wall and turned her around.

He put his hand in the middle of her breast. Her shirt was still on. Now Commander's usually hot pink orb became a dim pink orb that surrounded Haven's hand and arm. "Give me your life force, bit. You can't resist. The pain stops when you give in."

"Never," Commander said with no feeling or heart. She was too weak to do anything.

"This is what I think about (94)

our daughter,' Haven took a blue box out of his pocket and pressed the single, one button. The tube ejected out into space to never be found again.

"Nooo!" Edmund shot Haven with his laser watch. In that same second Haven wasn't touching Commander, she injected him with the crystal knockout solution. Haven fell out unconscious and Commander fell into Edmund's arms. A blue orb surrounded Edmund and then Commander's hot pink orb surrounded her again. She was draining Edmund's life force to get hers back.

"Are you alright?" Edmund asked.

"Not yet," Commander put Haven in a freezer tube but did not activate it. She picked up the blue box, "No one messes with my family or my body." The tube flew out into space.

"That's gotta be a signal," Willy told everybody.

"Move in!" Arison said. The thrusters exploded on the space station.

"I wonder who did that," Beavy replied.

"There's only one fighter," Commander Seducer.

"I don't mind," Edmund got in. Commander got in on Edmund's lap, "No boy." They took off.

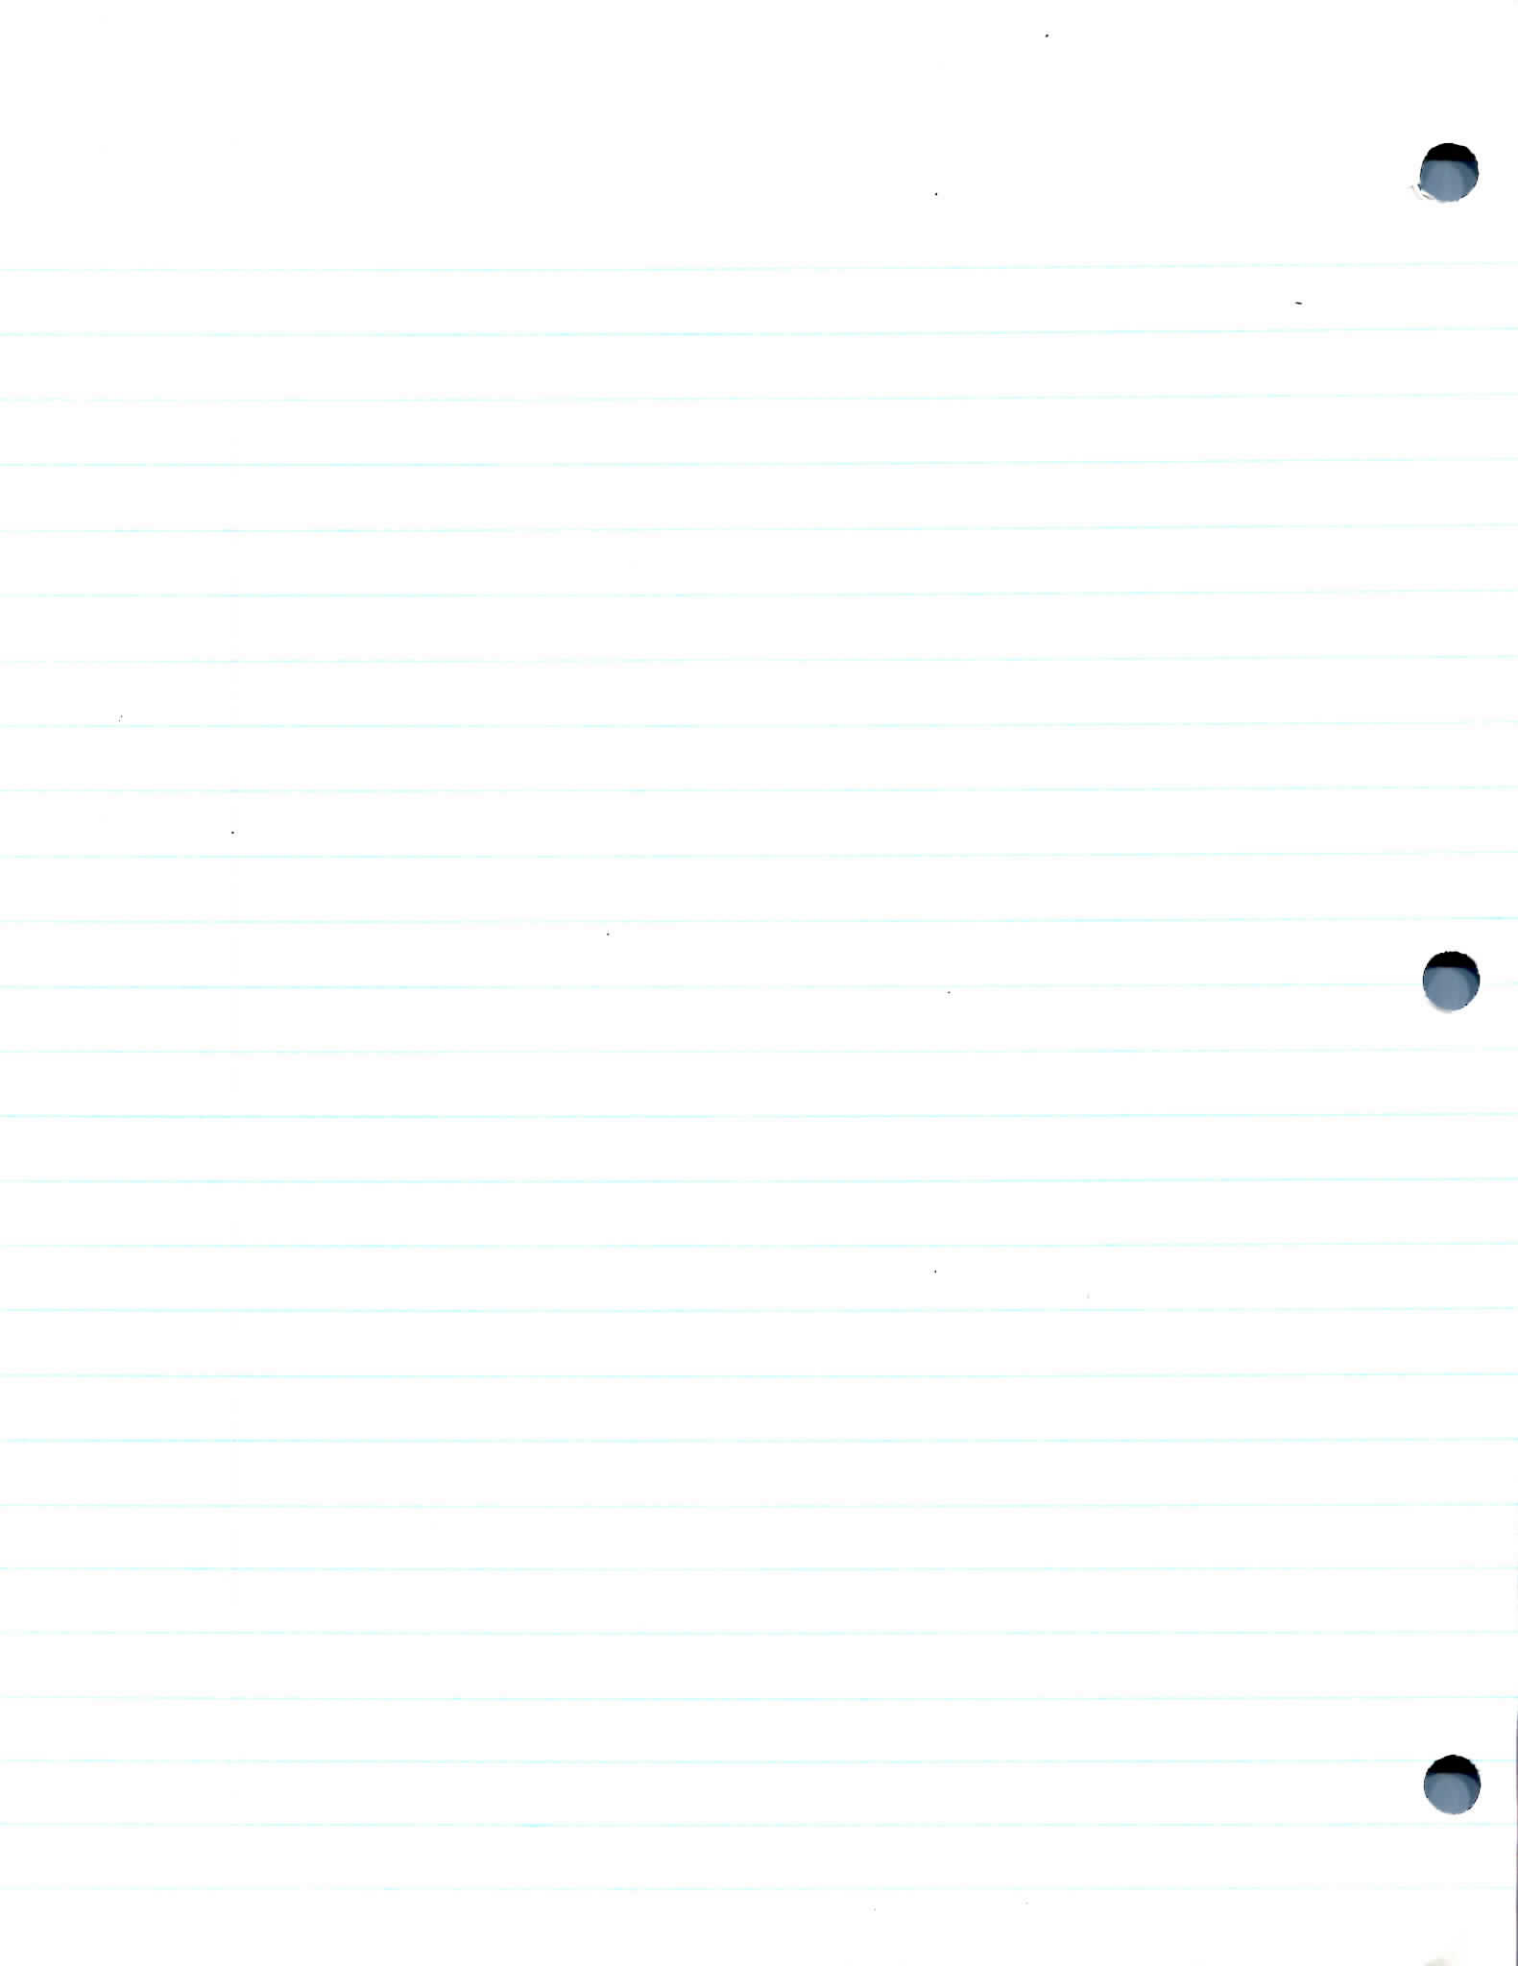

Astron, Arison, Beavy, and Willy all took out the space station in another huge ball of fire and crystal.

The Space Force had finally defeated the Dorodians and ended the war.

"Is she our brew mom," E.J. asked while carrying M.J.

"I don't know. Really, I don't know you two," Edmund answered honestly.

Chapter 99: The Extrodution (if this is  
the final  
book (novel))

The world had no more need  
of a space station.

Since Gitson had the blood samples  
of Grease Monkey and Acro, this  
is how they found out about  
their family tie.

The Smith's and Billy developed a  
relationship with Commander.

K.D.G. is still dating Willy.  
They now have a sensual  
relationship. It's now time for  
a freaky sex experience, not the 597)

regular shi-

Ms. Dike is now hanging around  
Cestron and wants to fu-- him  
night and day thanks to Commander.  
Cestron is glad Ms. Dike has  
finally loosene up.

Matt and Mimla got married and  
finally got to live their regular  
lives.

Erica and Gerry Geruston are now  
going out. They are very close but  
not as close as Erica and Edmund.

Commander and Edmund have had a ~~two-~~  
subbaby girl. They named her C.J.  
Dime. C.J. stands for both  
Commander Junior and Chaurice  
Virginia-Jasmine. Commander  
removed Edmund's and her bracelets  
but not the rings. They love  
each other. In the immortal  
words of Commander, I told you

that you'd one day be mine.

I, the author, personally left  
shi-out because that will help  
provoke your interest in the  
series if more books are released.

— The most dangerous author,  
Edmund Alexander Sims

P.D.: The Space Force has  
disbanded because there is no  
more threat to the Earth.

P.D.: E.J. - human / doctan

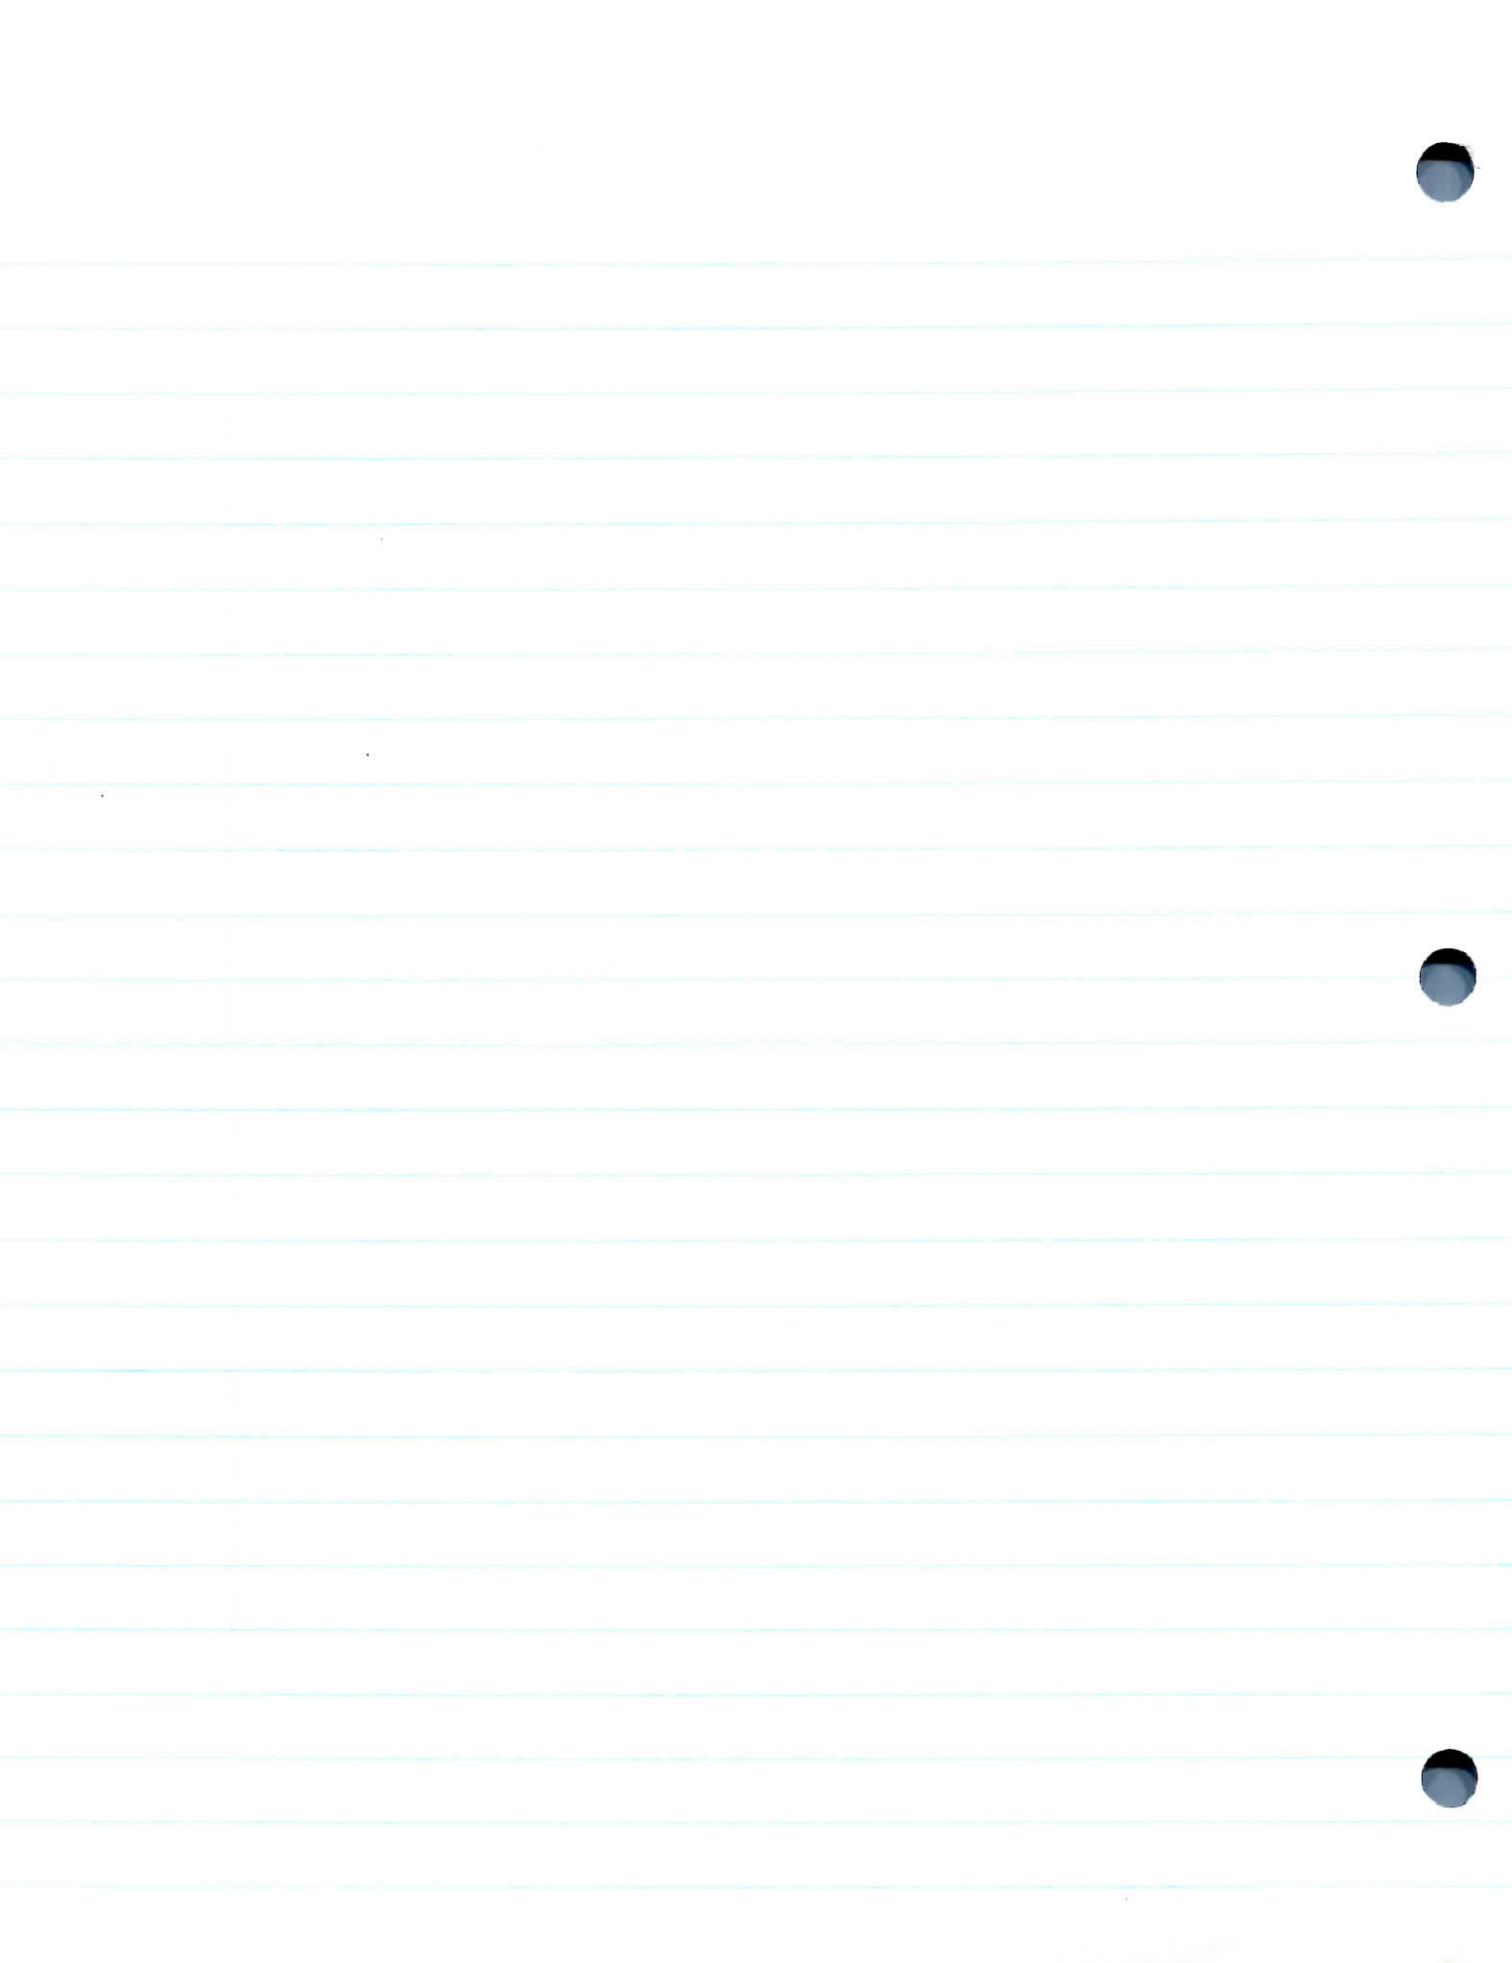

M.J. - human

C.J. - doctan ←

P.D.D.: I ain't the last book!

Yeah right  
I don't think so  
no infidelity

just bedding ha ha ha!

Woah

Chapter 100: Special Thanks Ya.

I don't want to list people for  
I will leave out people and  
soon regret it, so:

Special Thanks Ya

everyone who I feel deserves  
it (I once again no who you are.

## D.D.C.: The Ultimate

This is truly the Ultimate book.  
Edmund's most explicit and best  
novel.

The perfect ending to the series.

Edmund's novel is brilliant. It  
brings together all of the  
characters in the Space Station  
Colt series.

Trick Ending!!! and storyline!

Read this book before they are  
all bought up!

The Final

The  
Ultimate
